NEW YORK

STOCKTON CAL Sept 20/1912.

Green, Tweed & Co.,  
109 Duane St.,  
New York City

I am using Palmetto packing under the following conditions

I buy the 1" for 2" cyl after being in shore on an axle of 10" nos I tear off outer covering and use 5/8" for valve stems of 2" cyl it is in there about 12 mos then take off one covering and use at 1/2" in 2" cyl valve stems it is good for about 8 mos shore (175 lbs steam 150° superheat then use the inside for packing valve stems etc - The inside is still soft and a person would never know it had been in use 2 1/2 yrs

Respectfully Yours,  
E B Myers,  
Chief Engineer

It's the packing that remains soft in  
service that lasts

**"PALMETTO"**

packing remains soft and pliable because of  
the lubricant contained in each single strand
