How Many Hides Has a Cow?

Sole leather is not adapted to soft, tufted upholstery of automobiles and furniture.

Hides must be split into thin sheets to produce upholstery leather.

The two lower, fleshy grainless sheets are coated, embossed and sold as "genuine leather." That is why so much "leather" upholstering cracks, rots and peels so quickly.

It is the ideal material for recovering your couches, davenports, dining chairs and morris chairs.

Fabrikoid averages twice the tensile strength of coated splits. It is waterproof and gives the appearance and "feel" of the best grain leather.

Sample of either quality free. Mention your dealer's name. Or if you send us 50c, we'll send a large working sample 18 inches by 25 inches, sufficient to cover a chair, etc. Write us today.

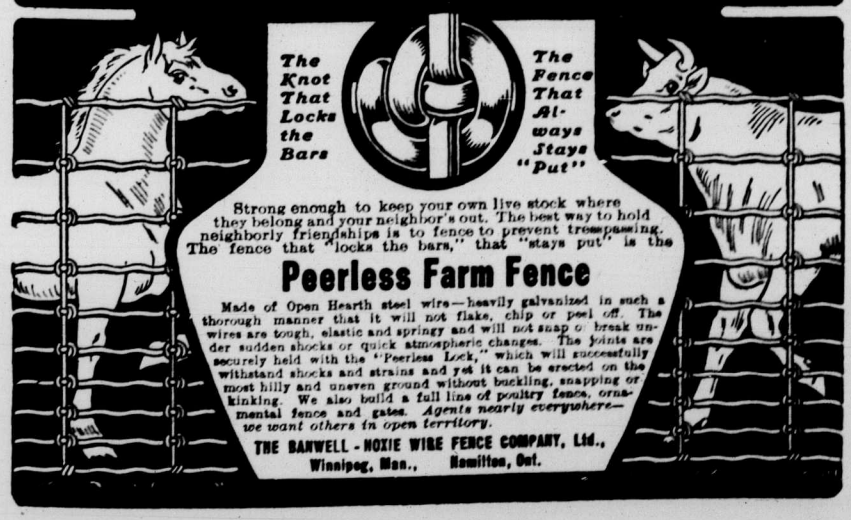
PEERLESS PERFECTION



Strong enough to keep your own live stock where they belong and your neighbor's out. The best way to hold neighborly friendships is to fence to prevent trespassing. The fence that "locks the bars," that "stays put" is the

Peerless Farm Fence

Made of Open Hearth steel wire—heavily galvanized in such a thorough manner that it will not flake, chip or peel off. The wires are tough, elastic and springy and will not snap or break under sudden shocks or quick atmospheric changes. The joints are securely held with the "Peerless Lock," which will successfully withstand shocks and strains and yet it can be erected on the most hilly and uneven ground without buckling, snapping or kinking. We also build a full line of poultry fence, ornamental fence and gates. *Agents nearly everywhere—we want others in open territory.*
