

THE FARM AND GARDEN.

Black Knot on Plum Trees. This disease is well known to be contagious. It is not caused by insects, but is found by the work of a fungus called Sphaeria morsosa, which is propagated by spores of seeds, and spreads in the young wood by the threads of its mycelium.

The Life of a Farmer. There is a quiet about the life of a farmer, and a peace about his profession. A professional man is doomed sometimes to feel that his life is a mere struggle for existence.

The Out-Worm Fall Plowing. We find out-worming about a poor wretch, but with without apparent cause, is not treated carefully; furthermore the article is not without considerable merit.

When I learn, says a writer in the New England Farmer, that only one farm in twenty-five is a good farm, the wonder is not that the rest are so many bad, but that so many are so good.

General Notes. George Davis, of New York, has aged 74, and had been forty-two years blind. He is now blind, but he has been blind for many years.

Statistical relative to the profit derived from cattle in France states that the milk furnished by the cow of average size exceeds 1,000,000,000 lbs. of the milk of the ox, and milk principally in agricultural operations.

Prof. Cameron, of Edinburgh, Scotland, says that while the milk of individual cows varies very much in composition, the milk of the herd is of a more uniform composition.

Prof. E. B. Arnold is reported as saying that he had taken the milk of three patrons of a factory, in October, who were feeding nothing but corn, and that the milk of three others fed on nothing but corn bran.

The Utility of Lightning Rods. Farmers are so frequently imposed on by the lightning-rod vendors, who show their wares by striking a lightning-rod into the ground, and then holding it up to the sun.

AROUND THE WORLD.

Interesting Items From All Sources. A Texas has killed over a hundred deer this year. A pure white blue bird has been shot at New Haven, Conn.

—A Chinaman in Little Rock, Ark., has a book printed in 1863, with the title "The Chinese noticed here" is the announcement of a Boston bookshop.

—An Illinois farmer astonished Deatur by going into that place with a train of six oxen, and with a team of oxen drawn by a steam road locomotive of his own invention.

—The Greaves navy compasses one or two iron-hull frigates, a couple of monitors, some half-dozen iron screw steamers, making the number of men amount to about seventy thousand.

—The Hon. H. G. Howard, younger brother of the Hon. H. G. Howard and Duchess of Sutherland, has just returned from a visit to the gayest city in France.

—The cable linking Metz and Strasbourg, the work on which has been long suspended, are now being completed.

—A French man has been trying, with some success, the plan of using coal boats by land. A railway is laid on the side of the canal, and in this are run small locomotives of four or more tons.

—The English embroidery which is most effective in appearance is most costly. It is much used for leading to lace and fringe.

—The Methodists church at Centreville, N.C., was lighted and decorated for the wedding of Mrs. Taylor and Mr. Merchant.
