

DOMINION CAPITAL

Fuller Cabinet Representation for British Columbia.

Third Largest Contributor to the Federal Finances.

(Special Correspondence.)

HOUSE OF COMMONS, Ottawa, April 15.—Before the end of the session it is more than probable that fuller cabinet representation will be given to British Columbia. The members from that province are pressing the claims of the west for fuller cabinet representation, whilst the position of the province as the third largest contributor to the federal finances, and the claim that that fact gives to it larger voice in the executive of the country are being well urged in season and out of season on the premier. How the new cabinet position will be arranged is not quite certain, and possibly may require some considerable thought, but seems evident that the department of the interior will supply a large portion of the new department. The recent illness of Hon. Clifford Sifton, caused, as is said by overwork, though it is hinted on the Opposition side that his anxiety to keep R. L. Richardson out of the commons had a good deal to do with the overwork, draws attention to the immense quantity of work which he has in his department and to the necessity of dividing the interior into two branches at least. At present the crown lands, geological survey, Indian affairs, mines and minerals, immigration, and the control of the vast territories of the Yukon are all in the hands of the one man. A very general mistake that has been made is to suppose that the police exists, but the force is in the hands of the premier, and very rightly so. Many years ago Sir John Macdonald, realizing what afterwards took place, and foreseeing that at some future time the charge might be made of undue precipitancy in action, thereby causing loss of life, might be made against the police unless they were very strictly watched, took the control of that body into his own hands and they have ever since remained attached to the chief of the executive. Hon. William Templeman is eminently fitted for the duties and responsibilities of a department. Careful, just and painstaking in his procedure, and in forming an opinion, he would make, with his vast fund of information, an admirable member of the executive if clothed with all the power of a departmental head. The eternal fitness of things suggests that Hon. Mr. Templeman is the man, coming as he does from the largest and richest mining province in the Dominion, to be placed in charge of the department of mines, and no one with the slightest knowledge of the situation could imagine a more useful department than that of mines would prove to the Dominion. The immense mineral resources, the growing wealth of Canada from those sources, and their capacity for yet unknown development, all point to the importance of having a department of mines. In 1888 the revenue of Canada from her minerals was \$10,000,000, in 1896 it had grown to \$22,000,000, whilst four years later, in 1900, it had reached the enormous sum of \$64,000,000. Nor has the highest point been reached yet, as with wise protection, with encouragement, the above figures may be far outdistanced, and no danger be incurred of exhausting Canada's resources. With the mines and minerals would naturally go the geological survey, a branch at present full of opinionated theorists, who want a pretty thorough shaking up in the worst way, but who are likely to suffer the very worst fate of being left to the logical outcome of their own methods, or want of methods, unless their branch is transferred to the charge of a minister who has time to look into it and its doings very carefully. Attached to these would be the Indian affairs, in which British Columbia is deeply interested, and which would, with the others, give the minister in charge plenty to occupy his time with satisfaction to himself, and with marked benefit to the country. These changes are, however, in the air. What the exact result will be is hard to say, but it more than probable that when the session is over the Hon. William Templeman will enjoy full departmental control, and British Columbia have her due share of representation in the cabinet.

BICYCLE RACING SEASON.

Opened at Charles River Park, Massachusetts, Yesterday. BOSTON, Mass., April 19.—The bicycle racing season opened at Charles River Park today, a one-hour motor race paced, being the leading event. It was won by Nat. Butler, with 35 miles and two laps. Bobby Walthour second, Hugh McLean third. Walthour lost five laps on the start because his wheel broke down. The champion then went to the front and soon had trouble, too, with his wheel, and was passed by Butler, who held the lead to the finish. The champion quit when he had made 23 miles. The purse of \$1000 was divided.

PEACE DELEGATES.

Left Pretoria to Confer With Burgheers in Different Places. PRETORIA, April 19.—The Boer delegates left here at nine o'clock last night for various destinations to confer with the burgheers in the field.

SILVER KING MINE.

Ore Body Not Run Out, Neither Is Mine to Close.

(Special to the Miner.)

NELSON, B. C., April 17.—Statements to the effect that the Silver King mine, operated by the Hall Mines, had run out of ore and that it was to be shut down on the 1st of May, have been made. It also has been stated that Captain J. R. Gifford, manager of the mine, had resigned. The stock has fallen in London, which would give color to these rumors. Captain Gifford was seen in relation to the statements and said there was not a vestige of truth in the one that he had resigned, and as to the mine shutting down it was a mere inference and nothing more. The work of development is in progress and ore is being shipped daily to the smelter. As to what portion of the mine the ore was being extracted he said he did not care to state, as that was something which only concerned the company. As to the development of the mine which he had submitted to the last general meeting of the company was being carried out. As to the fall of the stock in London it did not signify much of anything. There was only a little dealing in it and the fall he claimed had nothing whatever to do with the condition of the mine.

SINGULAR COINCIDENCE.

Two Men, Enemies in Life, in Death Lie Side by Side.

(Special to The Miner.)

NELSON, B. C., April 17.—A somewhat dramatic incident took place in an undertaking establishment here yesterday. About four years since Mrs. Sinclair took up a homestead in North Idaho, a short distance south of the international boundary line. An adverse war was put in soon by James Amoit and the case was tried before the land office, and resulted in a decision in favor of Mrs. Sinclair, who was assisted in the contest by her son, H. V. Sinclair. This judgment was appealed from and after a long legal contest, which was only concluded a short time since, Mrs. Sinclair secured a decision in her favor. The son came to Nelson and so did Amoit, where they secured employment. Sinclair died on Tuesday and was taken to an undertaking establishment, and on Wednesday Amoit died and on Thursday was brought to the undertakers and his body placed alongside that of Sinclair's. It seems singular that the two enemies should share the same apartment when they were cold in death.

BEEF FROM CANADA

LONDON BUTCHERS' ASSOCIATION ASK FOR THE REMOVAL OF RESTRICTIONS.

FEAR A MEAT FAMINE DURING THE CORONATION OF THE KING.

LONDON, April 17.—A meeting of the butchers' association here tonight, at which representatives of the entire meat retail trade of London were present, unanimously petitioned parliament to remove the existing restrictions on the importation of cattle from Canada and Argentina. The meeting asserted that in view of the reduction in the American meat supply the action they asked was imperative in order to prevent a meat famine during the coronation of the King.

Reasons similar to those adopted to-night will be presented at a meeting of representatives of the meat trade from 120 cities of the United Kingdom which will be held at Manchester April 23rd. In replying to a question in the house of commons this evening R. V. Hurbury, president of the board of agriculture, said the government had no reason to apprehend a serious meat shortage, and that it could not entertain a proposal to remove the restrictions on cattle imported from Canada.

THE LORD'S DAY ACT.

Decision Sustains the Constitutionality of the Law. TORONTO, Ont., April 17.—The Court of Appeal today gave judgment in the case of the Lord's Day Act of Ontario, Chief Justice Armour dissenting. The decision sustains the law in regard to prohibition and Sunday sales, Sunday labor excursions and street cars, but holds the provincial act does not apply to corporations operating exclusively under the Dominion franchise, nor to individual employees of corporations. The latter exception will probably greatly nullify the working of the act.

BOB COMES TO TERMS.

Will Fight in California For World's Championship. NEW YORK, April 17.—Bob Fitzsimmons sent a telegram today to J. J. Jeffries, saying he was convinced that the only state where a glove contest between them could be held was California. Fitzsimmons further said that he would meet Jeffries any where in California and at any time box for the championship of the world, and that he would leave the making of the arrangements to Jeffries, to do the best possible for all concerned.

DUKE OF MANCHESTER.

LONDON, April 17.—In the house of lords today official announcement was made of the annulment of the bankruptcy of the Duke of Manchester, enabling him again to take his seat among the hereditary legislators of the British Empire.

NEWS FROM OTTAWA

MULLOCK'S BILL REGARDING RAILWAY DISPUTES IS TO PREVENT LOCKOUTS.

DAWSON PLEADED OVER SIFTON'S DISPATCH-LAPSED CLAIMS ARE THROWN OPEN.

(Special to the Miner.)

VICTORIA, B. C., April 18.—An Ottawa special says Mullock's bill regarding railway disputes is to prevent lockouts by arbitration between companies and employees.

Information has been received that Premier Seddon of New Zealand and Premier Barton of Australia will not come through Canada on their way to the coronation ceremonies, but they may return before this way. The Hon. C. P. R. bill, giving power to the company to do mining, lumbering, smelting and carry on works of irrigation on their own lands, passed the Railway Committee today. It also extends the time for the building of the road from New Westminster to Vancouver for five years.

So far the medical officers appointed to go to South Africa with the fourth contingent are Surgeon Major Elliott, Quebec; Surgeon Captain A. R. Murray, New Brunswick, and Surgeon Captain W. H. Gye of Chatham, Ont. The fourth has not yet been selected.

Dawson special says: "Word was received here a few hours ago that all lapsed and abandoned claims within the Treadgold concession are at once to be thrown open to entry by any one who wishes to stake them. This is believed to be the greatest enthusiasm, and is commented on in the most favorable manner. The miners are jubilant over the action of the government, and fear so generally indulged in that the Treadgold concession would stand above of the large area of valuable ground are now dispelled."

A NARROW ESCAPE.

Three Men Carried Over Dam of the Granby Smelter.

GRAND FORKS, B. C., April 19.—Three of the Granby smelter employes, D. Kelly, G. Kelly and D. Lowe, were swept over the smelter dam this morning in a small boat. Their escape from instant death was almost miraculous. D. Kelly and D. Lowe were engaged in removing the artificial crib-work added to the top of the dam during the low water season. A cliff under the orders of foreman O'Keefe, they proceeded to accomplish their task by working from a boat tethered above the head of the dam and held in place by a rope stretched across the river. After some of the timbers had been removed the boat was carried through the gap and snapped in two. The three occupants were hurled into the seething cauldron below. Luckily each of them seem to have been engaged in removing the artificial crib-work added to the top of the dam during the low water season. A cliff under the orders of foreman O'Keefe, they proceeded to accomplish their task by working from a boat tethered above the head of the dam and held in place by a rope stretched across the river. After some of the timbers had been removed the boat was carried through the gap and snapped in two. The three occupants were hurled into the seething cauldron below. Luckily each of them seem to have been engaged in removing the artificial crib-work added to the top of the dam during the low water season. A cliff under the orders of foreman O'Keefe, they proceeded to accomplish their task by working from a boat tethered above the head of the dam and held in place by a rope stretched across the river. After some of the timbers had been removed the boat was carried through the gap and snapped in two. The three occupants were hurled into the seething cauldron below. Luckily each of them seem to have been engaged in removing the artificial crib-work added to the top of the dam during the low water season. A cliff under the orders of foreman O'Keefe, they proceeded to accomplish their task by working from a boat tethered above the head of the dam and held in place by a rope stretched across the river. After some of the timbers had been removed the boat was carried through the gap and snapped in two. The three occupants were hurled into the seething cauldron below. Luckily each of them seem to have been engaged in removing the artificial crib-work added to the top of the dam during the low water season. A cliff under the orders of foreman O'Keefe, they proceeded to accomplish their task by working from a boat tethered above the head of the dam and held in place by a rope stretched across the river.
