That our Rightly made Clothing is Economical for any Man or Boy to wear is a fact. The dollars it costs divided by the months, it wears shows the actual worth. When you come right down to the wearing value of a garment aying nothing about the Style or ht, which our garments Possess. Some uncrupulous competitors are fond of calling us High-Priced and of comparing heir prices for their kind of clothing with the Prices we ask for our kind. If you make a ratio of Prices to the quality our Prices are the Lowest every

A singular complaint comes from the fire insurance companies. It relates to large losses in the farming districts on live stock, due, as reported by the farmers, to lightning in connection with barbed wire fences. Most of the animals killed in this way were near the wire fence at the time, and it is supposed the metal strands at as a conductor in a degree sufficient to largely increase the cost of such insurance.

On Friday evening last Mr. and Mrs. Thad. Leavitt gave an entertain met in the lecture room of the high school. Only a brief notice had been given, so that the audience was not as large as it would otherwise have been laft. In proved to be a large as it would otherwise have been laft appreciated by their critical audience.

One of our leading merchants wishes us to try to impress upon the farmers the necessity of taking more pains in preparing their butter for market. One evening this week he ordered some "gilt-edge" sent up to the bouse. The clerks had taken it in from one of the best farmers in this section. He spread a large piece of bread with the delicious looking compound. One bite was all he could take of it in its natural state. Being of an economical turn, and not wishing to lose the large slice of bread, he tempered the flavor of the butter with a generous slice of black seed onion, which he candidly avers was preferable to the butter. Housewives, please look a little closer after the cream pails and see that the milk is thoroughly worked from the butter before bringing it to market.
