

feature of the work of invaluable service. Indeed, this Thesaurus of medical terms and phrases will be found of inestimable value to all persons who are called upon to state or explain any subject in the technical language of medicine.

Physician's Pocket Account Book. By Dr. J. J. TAYLOR. Published by the Medical Council, 4105 Walnut Street, Philadelphia.

This handy little book combines day-book and ledger in the one volume, and is so arranged that only one entry is necessary. It compels even the most careless doctor to make his entry so that it could be produced as legal evidence if necessary. The size is the very best for the pocket, and the book as a whole is one greatly to be recommended for the busy man.

Manual of the Diseases of the Eye, for Students and General Practitioners. By CHARLES H. MAY, M. D., Chief of Clinic and Instructor in Ophthalmology, College of Physicians and Surgeons, Medical Department, Columbia University, New York, 1901-1903; Ophthalmic Surgeon to the French Hospital, New York; Consulting Ophthalmologist to the Red Cross Hospital, New York; Adjunct Ophthalmic Surgeon to Mt. Sinai Hospital, New York, &c. Third edition, revised, with 275 original illustrations, including 16 plates, with 36 colored figures. New York: Wm. Wood & Co., 1903.

The first edition of this book appeared in 1900. An examination of its contents revealed its value, and a most favorable review appeared in this journal at the time. That the book was well received by the medical profession is shown by the fact that a second edition was called for in 1901. This issue was exhausted in three weeks, and two reprints were published.

Now a third edition is demanded. For this edition every page has been examined, alterations made where necessary, some new plates added, and the book brought thoroughly up-to-date. The appearance of this third edition will still further enhance its popularity. It is one of the very best of the smaller works on this subject.

J. T. D.

A Text-Book of Pathology. By ALFRED STENGER, M.D., Professor of Clinical Medicine in the University of Pennsylvania. Octavo volume of 933 pages, with 394 text-illustrations, many in colors, and 7 full-page colored plates. Philadelphia, New York, London: W. B. Saunders & Co., 1903, Cloth, \$5.00 net; sheep or half morocco, \$6.00 net. Canadian Agents, J. A. Carveth & Co., Toronto.

This work is characterized by the thoroughly practical way in which pathology and clinical medicine go hand in hand. The new edition contains all the latest advances of pathology, and has a useful appendix on technic, besides many new illustrations. The book is one of the best one-volume works that has been published, and is especially suited to students.
