MIRIMACHI STONE

FRENCH FORT QUARRY.

JOHN LAURIE, Sole Agent, 162 *St. James St.,* MONTREAL.

Used in some of the finest buildings in Canada. Stands the climate;

improves with age; does not absorb moisture.

CHIEF ARCHITECT'S OFFICE, OTTAWA, August 1st, 1893.

FRENCH FORT SAND-STONE

DEAR SIR,—The new Departmental Building in this city has been built of this stone—upwards of 1,000,000 cubic feet having been used.
Having inspected the quarries, I am able to state that it is almost unlimited in extent, and blocks of almost any size can readily be obtained; it is of a most pleasing colour, which seems to improve with age, very easily wrought, and in that respect alone has the advantage of most of the sand-stones at present in use. The stone was wrought and placed in this building quite green from the quarry; and notwithstanding that the variations in temperature during the past severe winters have been from 20° to 40° in twenty-four hours, it has not been in any way impaired.
Yours truly,
T. HOS. FULLER, Chief Architect.

The "STAR VENTILATOR"
SECTIONAL VIEW Galvanized Iron, Copper or Brass.
Down Drafts Prevented.
For Ventilating Mills, Factories, Foundries, Breweries, also Churches, Schoolhouses, Theatres—in fact all kinds of buildings, none equal the "Star."
A cheap Ventilator which will not do the work required is costly at any price; our claim for Superiority of the "Star" Ventilator is based on Merit only—believing the first cost to be a secondary consideration.
Send for a copy of our little book on Ventilators.
