

The Colonist.

FRIDAY, DECEMBER 15, 1893.

UNJUST DISFRANCHISEMENT.

The city election law is defective and it is unjust in its operation. Some, for instance, who have paid large amounts on real estate...

We believe that the property owner should be entitled to vote whether he pays the amount levied on his real estate or not. The assessment is not like a debt which can be repudiated or its payment avoided.

We trust that when the Municipalities Act is amended at the next session of the Legislature—as it is pretty sure to be—property owners will be freed from all disabilities.

POLITICAL ECONOMY.

There are persons, and presumably intelligent persons, in almost every community who express the strongest dislike to "political economy."

There would not be a greater mistake than this. The hater and contemner of political economy are, if they only knew it, as much political economists as ever Adam Smith was.

"They would also add greatly to their usefulness and avoid some rather ridiculous declamation if they would master the elementary truths that what are called economic laws are not pretended ethical maxims enacted by unchristian economists, but simply generalizations of everyday phenomena.

The laws that govern the economic world have been in operation ever since men formed themselves into communities and bartered commodities or bought and sold the products of their various industries.

SOUND DOCTRINE.

We are glad to find that at least one religious newspaper sees that Protestantism in Canada is not in need of an association except those that are purely and genuinely ecclesiastical to protect it from its enemies.

The existence of the Protestant Protective Association in this Province can be vindicated by showing that popular government, elected by showing that popular government, and free education and the Gospel have failed in their missions, and it cannot be successfully defended in any other way.

If the P. P. A. become powerful as a political force, religious dissension would be rife in the land, political discussion would become more bitter and political hate more intense.

THE ANARCHISTS.

The anarchists are not very numerous in England, but they are exceedingly noisy and impudent. It is difficult to understand why they are tolerated in that or any other civilized country.

They would also add greatly to their usefulness and avoid some rather ridiculous declamation if they would master the elementary truths that what are called economic laws are not pretended ethical maxims enacted by unchristian economists, but simply generalizations of everyday phenomena.

T. V. POWDERLY.

The resignation of General Master Workman T. V. Powderly of the Knights of Labor is an event of considerable importance. Mr. Powderly is, without doubt, a man of great ability.

organization had made him dizzy. He came at last, they say, to believe that he was the Order, and he consequently became imperious, despotic and intolerant of opposition.

It is just possible that there is some truth in these strictures, and that one of all these faults of character and conduct contributed to his downfall. But to us the wonder is not that he has found it necessary to resign after a fifteen years' lease of power, but that he was able to hold the leadership of so large a body of men for so long a time.

There is no question that Mr. Powderly's influence over his fellow-Knights was, on the whole, exercised for their benefit. His object was to raise not only the social but the moral and intellectual status of the workman.

Mr. Powderly's successor in the Master Workman's chair is not inappropriately named Sovereign. Mr. Sovereign is said to be a man of good attainments and high moral standing.

AN INGENUOUS ARGUMENT.

The outcry against the Wilson tariff bill is loud and unceasing. The industries that have for a long time been enjoying a very high degree of protection do not relish the prospect of being deprived of their privileges.

The coal mine owners of the East and the South take this line of argument in order to prevail upon members of Congress to oppose placing bituminous coal on the free list. The way in which the advocates of tariff reform meet these representations is, to say the least, ingenious.

Table with 2 columns: Exports, Imports. Values in millions of dollars.

American coal in the foreign market has no protection, yet it is found profitable to export coal from the United States. That the trade is a prosperous one is proved from the fact that it goes on increasing from year to year.

Then it is shown that there are industries in different parts of the United States that would be greatly benefited if this raw material of manufacture, coal, were admitted into the country duty free.

of the continent the manufacturers of California import soft coal from British Columbia and Australia, and pay the tax, but the duty prevents New England from taking the coal of Nova Scotia.

We do not see what the advocates for a protective duty on coal can say to this argument. The New England or the California manufacturer would regard as reasonable. It will be seen from what we have quoted that the Americans have in view their own interests alone in this business of tariff reform.

THE NEW AMERICAN NAVY.

The Government of the United States has of late years expended a large amount of money in building a navy. Not very long ago American statesmen realized that their country was perfectly helpless at sea and that its seaboard was utterly defenseless.

Since the date of the last report nine ships of war have been launched, while six have been completed, accepted and commissioned. The vessels as regards material, workmanship and speed have been, in most cases, in excess of the requirements of the specifications.

Mr. Valentine Webster, of the Ceylon Co-operative Tea Gardens Co., Colombo, is spending a few days at the Victoria in the course of a round-the-world business tour.

Mr. Valentine Webster, of the Ceylon Co-operative Tea Gardens Co., Colombo, is spending a few days at the Victoria in the course of a round-the-world business tour. He was in South Africa, his native land, one year ago, and knowing that country thoroughly from end to end, he expresses surprise that any number of sensible men should look upon it as a desirable field for settlement.

There are no placer mines, and the quartz properties, the magnitude of whose exports has filled the world with wonder, are in the hands of vast corporations who work them systematically and scientifically. Men of all countries are recruited as free miners, but even if they do possess a little capital they find it useless to them—small capital cannot be successfully brought to bear.

AUSTRALIA'S PROBLEM.

How to keep the unemployed from starving, is an important and very serious question in New South Wales and other Australian colonies. How in a new and exceedingly rich country, naturally, it has come about that there are thousands of able-bodied men who cannot find work dependent on them with bread to eat, is a very long story, but one that may be studied with advantage by self-governing communities in which the conditions are somewhat similar to those of the Australian colonies.

At the third annual meeting of the B. C. Institute of Architects, held in the office of Mr. J. Gerhardt Tarkenton, officers for the ensuing year were elected as follows: President, Mr. C. O. Wickenden, Vancouver; Vice-Presidents, Mr. E. B. Bayne and Mr. R. Maltandain, Victoria, and Mr. Sharpe, New Westminster; Council—Messrs. Hoop, Day, McCarty, Hawks and Honeyman.

What was wanted was work for the idle, and it was wanted immediately. It would not do to destroy the men's self respect by making them paupers. The work must be real work, productive work, and not sham

Highest of all in Leavening Power.—U. S. Gov't Report.

work, created for the purpose of giving the destitute relief. It seems that large appropriations had been made for public works at the previous session of the Legislature, but there was difficulty in getting money, and the Government was not prepared to go on with them at once.

THE SALVATION ARMY WEEK OF SELF-DENIAL, which closed last evening, resulted in a collection of \$770 by the corps in this city. JAMES WILSON, who is wanted at Tacoma for having a burglar's tool in his possession, cannot be arrested here if located, the offense not being extraditable.

THE CITY.

THE SALVATION ARMY WEEK OF SELF-DENIAL, which closed last evening, resulted in a collection of \$770 by the corps in this city.

JAMES WILSON, who is wanted at Tacoma for having a burglar's tool in his possession, cannot be arrested here if located, the offense not being extraditable.

MR. FRANK HEALY and Miss Grace Seabrook, stepdaughter of Capt. Brown of the sealer W. P. Hall, were married on Wednesday at Pasadena, Cal., the home of the groom.

MESSRS. Bodwell & Irving will ask for a private bill at the next session of the Legislature to amend and consolidate the acts respecting the B. C. Southern Railway Company.

THE Cariboo Hydraulic Mining Co., Ltd., of Vancouver, was duly incorporated on the 7th ultimo, with a capital stock of \$300,000, and Messrs. J. M. Burton, J. M. Lafevre and J. D. Townley as the first trustees.

A FINE specimen of coal from the Port McNeill lands was on exhibition yesterday at Henry Croft's office. It came from a surface of a 14-inch seam, and might easily be taken for a piece of the famous Wellington coal.

EDWARD HUMPHREYS, a Store street cadaver, was admitted to the surgical ward of the Jubilee hospital last evening. He had gone home in a state of semi-intoxication, and falling down the stairs cut his head very badly.

THE Golden (B.C.) Lumber Co., Ltd., has been incorporated, with Messrs. Thomas H. Cochran, F. F. Armstrong, S. Barber, M. Carlin and J. F. Armstrong as first trustees. The capital stock is \$100,000, in 9,000 shares.

THE superintendent of the Church of England Chinese mission thanks all kind friends for their help in providing refreshments and in other ways helping in making the anniversary entertainment on Tuesday evening so successful.

HON. F. G. VERNON, as Gold Commissioner, gives notice in yesterday's Gazette that all placer claims and leaseholds in Vancouver Island and adjacent islands, legally held, may be laid over from the 15th of November until the 1st day of June, 1894.

AS JIM, who was arrested on Tuesday for the supposed theft of a number of necks found in his possession, regained his liberty yesterday, having been looked up about thirty-six hours. His claimants have purchased the necks in Vancouver, and the police could not disprove his statement.

MR. WILLIAMS, the telegraph agent at Port San Juan, was the victim of a painful accident last evening. He was extracting the load from a rifle cartridge when it exploded, the ball going through his hand. Having plenty of nerve, and being far from medical aid, Williams, with little assistance, attended to the wound himself, and the hand is healing quickly.

THE Court of Arbitration in the matter of John and the Victoria & Sidney Tramway Co. case ended taking evidence yesterday noon, and spent the remainder of the day listening to the arguments of Messrs. Ernest V. Bodwell and H. Dallas Holmeken, counsel for the company, and Mr. John respectively. The arbitrators took the matter into consideration before giving their award. There is another case to be heard between Mr. Harrison and the company, the particulars of which are practically the same as in that just concluded.

THE Public Market building will present an animated scene next week, for by that time a large portion of the premises now uncoupled will be taken up and business there will be brisker than it has been heretofore. Three stalls have been leased to a merchant who proposes dealing extensively in grain, shipping foreign, whenever opportunity offers. Considerable interest will also be attracted to the market in a few days by the receipt of about 400 carcasses of frozen mutton, which are to be cut up and sold at the market by local dealers.

THERE is every reason to believe that the identity of Victoria's highwayman of November is no longer a mystery, the quartette of crooks tried at Nanaimo on Wednesday being much more than suspected of having had a hand in lawless operations in Victoria. Bradley, Welch and Sweetman, who came from the Sound, were all in the Police court dock here, having been arrested on suspicion and subsequently charged with vagrancy. They promised to leave town at once if discharged, and were afforded the desired opportunity.

JOHN HAYDEN, caretaker of the new isolation hospital, is under arrest at the Provincial police station, charged with an assault upon William Johnson, one of Constable Brown's employees. The trouble occurred yesterday afternoon and will be thoroughly investigated before Magistrate Macrae to-day. According to Johnson's story, corroborated by the other workmen, Hayden, who is a man of violent temper and quarrelsome disposition, entered one of the completed rooms where Johnson was planning a board and told him to get out—"This is no workshop." Johnson replied that he would clear the shavings away, and proceeded to do so when Hayden sprang upon him, striking at his head with a heavy stick and causing Johnson to fall insensible, his blood spattering the walls and floor. The carpenters rushing up pinioned Hayden and prevented him from doing further violence until the arrival of Sergeant Langley, into whose charge he was given. Dr. Richardson attended Johnson's injury—a cut about two inches long—and expressed the opinion that a slight fracture of the skull was also apparent.

THE meeting regretted to have taken place, in their opinion, a gross act of injustice—and this not by inadvertence—to the other competitors had been perpetuated."

THE MARRIAGE.

An Outline of the Evidence.

A Strong Character Evidence.

The second day adjourned as usual. Thursday morning, the witness, which a true bill previous evening, The prisoner, A. Morrison announced he appeared as a witness. The jury chosen William Shaw, Aden, William St. Robert Davidson, Hiam Goo, Thomas and H. B. Rendall the prisoner had obtained at the instance thirteen had stood names out of the p. thus exhausted in a large map of which the table before the jury were pointed out ferred to throughout Hoch-Theodor General, opened up with an address he made a comprehensive already exhibited yesterday John Marshall, a year of age, residing within about a mile of the prison. Marshall was early on the morning at the threshold of the door, and penetrating the skirt the back of the neck, and also showing an emphysema of the lungs, nose, breaking the pulled out of his mouth. The lamp was prepared for an even Mrs. The prisoner called on the bench of Mrs. Bartlett, in Sunday previous to let and another called on the bench. They had laughed about his girl, and to buy her a new dress to do it—pulling out socks of gold and next morning Mrs. Marshall was in Strobe's Marshall was seen afternoon of the day the prisoner at his house, arriving morning and staying day meal with the of the neighbors. came for the purpose with his proceedings. cartridges and two neighbor named W. engaged digging a hole to help him, and for his coat and threw it hitting a revolver, coat. This was a carrying a pistol which killed worked until about the two full cartridges under. As the former tell show that the cart the state they decided placed there by the secured, and would jury might see the theory. The p. Huntington on the hotel there over being in charge. A bed he burst into "Will they allow and sisters before the gentleman argued his first trial to show not have occurred of 19th, this being it carpenter making up pinioned Hayden and prevented him from doing further violence until the arrival of Sergeant Langley, into whose charge he was given. Dr. Richardson attended Johnson's injury—a cut about two inches long—and expressed the opinion that a slight fracture of the skull was also apparent.
