

PUBLISHERS' EXPLANATORY NOTE.

We think the two indexes which follow are self-explanatory so far as the numbered volume edition of this Work is concerned. We are, however, to issue an edition, the volumes of which will not be numbered, and for this, some explanation of the signs used in this Index Volume may be necessary.

In the Analytical Index we have used Roman Numerals to indicate the number of the volume referred to, and the usual Arabic figures to indicate the page referred to. The Chronological Index, when the volumes are known by their numbers, is self-explanatory.

For the information of those who have the edition, the volumes of which are not numbered, we append the following list of the volumes with their numbers.
