

## A NEW MANUAL OF ANCIENT GEOGRAPHY—(Now Ready.)

## A MANUAL OF ANCIENT GEOGRAPHY.

BY LEONHARD SCHMITZ, PH. D.,

Rector of the High School, Edinburgh, &amp;c.

With a Map by General Monteith, showing the Retreat of the Ten Thousand.

In one neat royal 12mo. volume, of about 300 pages.

The object of the author has been to prepare a manual for the student, which, within convenient limits, shall present a clear and complete outline of the geography of the Ancient World. The recent investigations both of critics and travellers have opened new sources of information and corrected numerous errors, rendering comparatively useless many of the older authorities. On all these points full information will be found in the present volume, which is, therefore, well calculated to supply a want that has been long felt and acknowledged.

From Prof. N. M. Benedict, *Rochester Collegiate Institute*.

I have given some time to the examination of the work, and think it admirably adapted to the purposes for which it was intended. It is both full and concise, and just what is needed by every student to an academic or collegiate course of classical study. I shall immediately adopt it in the Institute.

From Dr. P. Colburn, *Esq., R. I. State Normal School*.

From the hasty examination which I have been able

to give it, I am much pleased with its plan, arrangement, and execution, and think it a valuable addition to our list of school text-books.

From S. M. Capron, *Esq., Hartford, Conn.*

I have examined it with some attention, and am highly pleased with the general character of the book. I shall recommend it to my pupils as a book of reference, and an excellent companion to "Baird's Classical Manual."

## A NEW TEXT-BOOK ON ANCIENT HISTORY—(Lately Published.)

## A MANUAL OF ANCIENT HISTORY,

FROM THE REMOTEST TIMES TO THE OVERTHROW OF THE WESTERN EMPIRE, A. D. 476.

BY DR. LEONHARD SCHMITZ, F. R. S. E.,

RECTOR OF THE HIGH SCHOOL OF EDINBURGH.

With Copious Chronological Tables.

In one handsome royal 12mo. volume of four hundred and sixty-six pages, extra cloth. \$1 00.

The history is constructed with art, and every leading event is surrounded with such accessories as will place its importance clearly before the mind. The difficulty, rarely overcome by compilers of manuals, is, to present a broad historical view uniformly over a vast space of time, and including many nations and systems, and to reconcile the introduction of characteristic details with the general proportions of the narrative. Dr. Schmitz has happily surmounted these hardships of his task, and has produced a full and masterly survey of ancient history. His manual is one of the best that can be placed in the student's hands.—*Athenæum*.

The work is all that, and more than, he represents it to be. The general accuracy of the work, therefore, seems to us unimpeachable, while the diction is concise, lucid, fluent, and vigorous. The chronological table appended is comprehensive and well arranged; and the minute index added to this renders the volume one of the most valuable historical works of reference.—*N. Y. Commercial Advertiser*.

From Prof. Andrew D. White, *University of Michigan*.

Schmitz's Manual of Ancient History I regard as the only one, easily accessible to American classes which contains the results of the latest European research.

From Prof. J. T. Champlin, *Waterloo College, Me.*

I have no hesitation in saying that it is by far the best manual of Ancient History with which I am acquainted. The introduction of the history of the non-classical nations is an entirely new and important feature, and with the greater completeness of the chronological tables and the general excellence of the whole, cannot fail to commend it to public favor. I shall recommend it to my classes with pleasure.

From W. J. Clarke, *Esq., Georgetown, D. C.*

One of the best compends of Ancient History with which I am familiar. The most philosophical in its arrangement, it combines most admirably the two elements most difficult to unite—conciseness and fulness. I shall substitute it for the work at present used in my classes, to which I give it an immense preference.

## CHEMICAL TEXT-BOOK FOR STUDENTS.

Enlarged Edition—Now Ready.

## ELEMENTARY CHEMISTRY. THEORETICAL AND PRACTICAL. By GEORGE

POWNER, PH. D., &c. From the seventh revised and corrected London edition. With numerous illustrations. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of 600 pages, clearly printed on small type, with 197 illustrations on wood; extra cloth, \$1 50; or leather, \$1 65.

Thoroughly brought up to the present state of the science, this work will be found in every way worthy to retain the high reputation which it has everywhere acquired.

We know of no better text-book, especially in the difficult department of organic chemistry, upon which it is particularly full and satisfactory. We would recommend it to preceptors as a capital "office book" for their students who are beginners in Chemistry. It is copiously illustrated with excellent wood-cuts, and altogether admirably "got up"—*N. J. Medical Reporter*.

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of

condensation with masterly tact. His book is concise without being dry, and brief without being too dogmatical or general.—*Virginia Med. and Surgical Journal*.

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on Chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine*.
