A report as to the advisability of

regarding the over-crowding of passenger boats, were the chief matters discussed and approved of by the board of

control at their meeting yesterday

morning.

Regarding the Teraulay-street extension, the board ordered the assessment

commissioner to report upon the costs

of an 86-foot street as well as the width

of 80 feet and 66 feet. Controller Foster said that the city's transportation system would be immensely improved if Queen-street were widened and Teraulay street projected at a width of 86 feet to Davenport-road. Controller Foster, however, thought that an 80-foot street would meet all the requirements.

the talks on young babies. Lately I have been dealing with older children, but I shall talk of babies again during the hot weather, when there are many things that worry us. I believe I have covered all the routine work of caring that the greatest possible number shall be well born and reared. Too much emphasis cannot be placed upon the feeding of children. You canupon the feeding of children. You cannot expect your boys and girls to be strong mentally and morally if their constitutions are undermined by a careless diet. There is no excuse for the irrational, irregular habits allowed and encouraged among children; and it is vastly important that a mother keep up her watchful vigilance all during childhood. If parents would only sense the truth that plain food and milk, fresh air and common sense are the real makers of destiny, the future of our country would be assured. ture of our country would be assured.
