BY-LAW ADVANCED BY BOARD LAST NIGHT

Question of Library, the Railway Company's Extension of Time and the Bridge Not Discussed.

Friday evening's meeting of the city council was devoted entirely to routine. Only a passing reference was made to the Carnegie library; the bridge was only jocularly mentioned by some rash alderman, and there was a complete silence

The Referendum By-law was advanced as far as possible, and a by-law was introduced for amending the by-law re-

specting plumbing regulations.

In the order of business the first communication read was from the deputy minister of public works, Ottawa, who wrote respecting the request for the old building as a site for the Carnegie library, stating that the de partment could not see its way clear to acceed to it. The revenue now derived \$1,910.86. Approved. from the place amounted to \$3,792 per annum. The communication was re

THREE PROPOSALS FOR CHANGING LOCATION

Will Be Discussed by Board of Trade Letter From Skagway Regarding Northern Improvements.

At the next general meeting of the board of trade, to be held on Friday, an important matter relating to the usefulness of the agent-general's office in London, England, will come up for discussion. At present the province contributes ten thousand dollars yearly cowards the support of this institution, nd it does not now appear that the office is giving satisfaction. There are three proposals to be entertained for efecting an improvement, and these are

1. The C. P. R. Company contemplate the erection of a block in the vicinity of Charing Cross, one of the great businces centres of the metropolis, which might be adopted as a suitable location for the office. 2. A scheme is on foot for a block, to be under the management of the Dominion, and to be supported by the different provinces. 3. A proposi-tion on foot to enlarge the usefulness of the Imperial institute, with a centrally ocated branch. This latter scheme, it s understood, meets with the approve of the agent-general, Hon. J. H. Turner, All these suggestions will, it is believed, be considered at the Friday meeting.

A meeting of the council of the board of trade was held on Tuesday, when President McQuade presided, and there were present Messrs. Todd, Lugrin, Seabrook, Pitts, Oliver, Grahame, G. H. Burns and Lindley Crease. Mesers. T. B. Hall and E. Crow-Baker were present on behalf of the Board of Trade Association. They said they considered it their duty as executors of the building to acquaint the board of trade, as the principal shareholders, with the present position of affairs. The board owns \$7,000 of the stock. In consequence of so many offices being vacant the building is going behind. On behalf of the co-directors they desired the board to assist in securing tenants. The council, however, failed to see what more could be done than has already been accom-plished in the premises. Upon the deputation retiring, it was resolved that it would be retained, that four per cent. the next quarterly meeting he would year. So long as there was a by-law of the gross earnings would be paid inmove to amend the by-law so as to abolish

vinced me that there are large deposits of gold and other minerals in that section of country.

I will give you a sketch of how I propose to operate in that locality, and if successful in finding mineral in commercial quantity I propose to run steamers from British Columbia ports on Stikine river to points in the Cassiar district without breaking bulk of cargo or clashing with American customs. This is not new to me, as I have done this successfully during the Cassiar excitement 23 years ago. To carry out the project which I have in view, it will require the outlay of several thousand dollars, which is too much for an individual to undertake without some little assistance from your government, and also concessions to such an extent as might be embodied in this agreement. I would be prepared to give good and sufficient bonds to carry out my part of it.

This is no "scheme" which I am attempting to involve the government in, but a legitimate enterprise, and one in which I propose to assume the greater financial burden. I simply desire some little assistance and protection, as well as some encouragement that, in case I develop something which may prove of value alike to myself and the Dominion of Canada, I may derive such benefits from the venture as my foresight and enterprise justifies.

I would thank you very much to give this matter a little thought and myself as much encouragement as you may think the project deserving, by honoring me with a repty at as early a date as your important duties will permit.

NAVY LEAGUE BRANCH IN EASTERN CANADA

One Recently Organized in New Brunswick by Envoy Wyatt - Part of His Address.

Jos. Peirson, honorary secretary of the Victoria branch of the Navy League, has received particulars of the recent organization of a branch in St. John, N. B., on the initiative of H. F. Wyatt, envoy of the parent sockty in Great Britain. There was a large attendance and the greatest enthusiasm manifested throughout. Among those present was Lieut, S. A. Roberts, R.N., of this city, and during the meeting Mr. Roberts described the establishment of a branch in Victoria. In the course of a very interesting address, Mr. Wyatt said that the life of an empire depended upon the possession of a navy und r one command which could take the offensive in war. The history of the British navy, however, had shown years of alternate panic and neglect. In 1834 the naval expenditure was only about £4,500,000, and 1840 was also a bad year. The British government to a certain extent lost sight of the importance of an adequate navy, forgot that upon the navy depended the safety of the merchant marine of the empire, the vast sea-born commerce of the British people approximating in value nearly £2,000,000,000 sterling.

He then traced the history of the Navy League and the purposes for which was formed. Although only organized in 1894, it had now forty-eight branches in Great Britain, of which seven were in London, twenty-six in the provinces, and fifteen in the great public schools. LOCAL "CENTRALS" SYMPATHIZE Canada there were, he said, five branches, the object being to educate the Hope the Vancouver Operators will Win people along the line of naval defence. The speaker then showed the danger to be apprehended from Russian aggression in China. Canada should be interested and operators in the Terminal City is still on, and negotiations between the China or shall an open market be maindirectors of the company and the strikwill eventually find their way there. The speaker also drew attention to the big increase that was constantly being made in the strength of the German navy, and referred to the passing of the German navy bill under which £73,000,000 was of this city, the local operators are all on hand, and Victorians are spared the annoying inconvenience of ceaselessly but vainly ringing and shouting for the vocable proof of a national policy on the "centrals," who have flown.
