PLAIN AND FANCY CEILINGS.

METAL GOODS

FOR OLD AND NEW BUILDINGS.

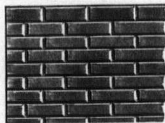

ROOFING. SIDING. CEILINGS.

Our Safe Lock Metal Shingles are so constructed that they interlock each other on all four sides, absolutely preventing leaky roofs. They are made in one piece, having no cleats or rivets to get loose. Will send model sample upon application. We also make various styles of standing seam and flat roofing.

Metal Siding in large and small sheets, many styles and patterns to select from. Old buildings easily made new at small expense. Warmer in winter, cooler in summer. Dry and wind proof, practically fire and lightning proof.

Ornamental Metal Ceilings. In every way superior to plaster, always look neat, easily cleaned, everlasting, at small cost. We have latest designs to select from. Our ceilings are easily applied and are so constructed that joints are practically invisible. Can be put on right over plaster.
