A CHRISTMAS GIFT IDEA.**A STEAM TURBINE SEPARATING OUTFIT.**

FROM MR. HARRY BUTLER, BADMINTON.

MARCH 8TH, 1897.

DEAR SIR, I have now used your 75-gallon per hour Turbine Separating Plant four months, and it has realized my expectations in every way. An ordinary laborer or dairymaid can manage it, and being able to boil the water for washing milking pails, etc., with the waste steam, I do not think I am consuming much, if any, more fuel than I did before I adopted the Turbine Separator, as it dispenses with a furnace fire. I shall be pleased to show the Plant to anyone interested, as, in my opinion, it supercedes all Hand Separators for dairies of fifteen cows and upwards, a jet of steam doing all the work.

**HAND
CREAM SEPARATORS**

BEST LINE ON THE
MARKET.

ALEXANDRA SEPARATORS.

Size.	Capacity per hour.	Price.	Easy Work for	Recommended for
No. 12	160 Lbs.	\$30.00	Small Boy.	5 to 8 Cows.
