

Pud

I was suddenly surprised by cyclist struck by island. I remember nothing more until I wakened in hospital at 3 A.M. I was in hospital a little over a week. I had a severe bruise and laceration of left knee. The bruise I had had no effect on my driving ability.

My Chinese sheet has no ridges.

X - examination.

The schoppa I was thinking had a label in bottle. It was yellow in color. I had 3 slugs of that. I had no drinks with Alice. I had driven the road before. I knew the road in the road. I knew the visibility was bad. I knew it was raining.

My mind - which order was wandering.

I cut hard left - then I cut right.

I don't know what I did after I hit cyclist.

My last end didn't fly right around before.

I had paid much particular attention to island being there. If you twist any vehicle

Pud ~~if~~ You can ^{put} any vehicle ^{into} at ~~least~~ it will go into a ~~skid~~.

Re - examination -

If the bicycle I missed had been on right side of road I could have been able to see it.

By the Court -

The hill I missed was 20 or 30 ft away from me when I first saw it. It may have been a little more.
