—6 and 8 ".....	Wind and Rain.....		Stormy.	
—8 and 10 ".....	Changeable .....		{ Cold rain, if the wind be west, snow if east.	
—10 and 12 ".....	Frequent showers.....		Cold, and high wind.	
At 12 noon, and 2 P.M.....	Very rainy.....		Snow and rain.	
Between 2 and 4 P.M.....	Changeable.....		Fair and mild.	
—4 and 6 P.M.....	Fair.....		Fair.	
—6 and 8 ".....	{ Fair, if wind N.W.....		Fair and frosty, if wind north or north-east.	
—8 and 10 ".....	{ Rainy, if S. or S.W.....		Rain or snow, if S. S. W.	
—10 and midnight.....	Fair.....		" " " "	
			Fair and frosty.	

Observations—The nearest the time of the Moon's change, the first quarter, full and the last quarter, are to midnight, the fairer will be the weather during the seven days following.

- The space of this calculation occupies from ten at night till two next morning.
- The nearer to mid-day or noon the phases of the Moon happen, the more foul or wet weather may be expected during the next seven days.
- The space of the calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the Summer, though they affect Spring and Autumn nearly in the same ratio.
- The Moon's change, first quarter, full, and last quarter, happening during six or seven afternoon hours, i.e., from four to ten, may be followed by fair weather.
