MIDSUMMER TIDE OF TRAVEL CONDITION OF STOCK MARKET is his impression That There Will be a Better Demand for Shares After the Crops have Been Harvested-Investors are

ws From the Slocan, East Kootenay and Trout Lake-Contract Work at a Standstill in the Slocan-Development Active on Many Properties.

The fine summer weather that is prevailing all over the country has induced many of the eastern visitors to extend

the same as those now being obtained in the 80-foot tunnel already mentioned. I the 80-foot tunnel already mentioned. I obtained three samples for assaving purposes taken by myself at three separ-ate points along the tunnel, about six fect apart. I thought the samples taken would show fairly well, but was astonished to-day at the return given by Assayer Hast-ings Only sample No. 1 was assayed for copper, yet the returns given are as foltheir trips and prolong their stay in the province. The Kootenays and the Boundary country are full of eastern people and all the better known mining centres are receiving their full share of attention. Beyond the fact that contract work as such has re-ceived a sudden stop in the Slocan there is but little shares in the labor situation ings Unly sample No. 1 was assayed for copper, yet the returns given are as fol-lows: No. 1, gold, 1.00 ounces; copper, 6.08 per cent; total value, \$41.88. No. 2, total gold value, \$12. No. 3, total gold is but little change in the labor situation value, \$23. "I must say that these values are a revelation to me and I know that the manager will also be surprised, as special returns were not looked for from the ore as far as can be ascertained. There are many reports current as to certain prop erties opening up and as to the working of others by imported labor, but as a mat-ter of fact the mine owners and the men returns were not looked for from the ore in question, as the higher values were thought to be elsewhere, and the property is just so much richer than was supposed by the company through this discovery. The machinery which I installed consists of a double 6x8 link motion reversible friction hoist with a 40-horse power boiler and No. 3 1-4 drill and Cameron sinking pump. The company is now going to re-

are simply waiting for a possible change and in the meantime no particular action is being taken.

EAST KOOTENAY.

pump. The company is now going to re-ceive bids for and install a compressor Sovereign and another property in the firm of McCuaig & Rykert is rested. Next East Kooteney will be The owners of the Coronado will start The owners of the Coronado will start work on that property as soon as the gov-ernment decides to put in a trail. The gross returns from the smelter of the ore from the Delphine mine, near Windermere, was \$105.03 per ton. A number of prospectors from Bonner's nearest large pack outfits nassed which the firm of McCuaig & Rykert is interested. Next East Kootenay will be visited and the North Star, the property of Messrs. McKenzie and Mann, will be inspected. From there it is probable that Ferry with large pack outfits passed through Fort Steele last week, on their way to the Windermere country.

of Messrs. McKenzie and Mann, will be inspected. From there it is probable that they will proceed east. In speaking of the condition of the stock market Mr. Rykert said: "At present there is no market to speak of as there is scarcely anything doing, as is usual during the hot summer months. This is a season during which investors usually take vacations and are consequently out of flown. This causes quietness in stock circles and a a natural result prices The Estella shows a large amount of work. The shaft is now down 85 feet and the same character of ore is encountered as in the earlier working of the shaft. Development work on the Tontine group of mines on Quartz creek is progressthem the best prospects in British Colum-bia for the work done. Two shifts are ing rapidly. Seven men are at present employed working two shifts running a tunnel, which is now in 70 feet. now busy prospecting and this will be kept up until the close of the season and

The Tontine group is over the divide, about four miles from the Big Chief and the property thoroughly prospected. Then it will be determined just what machinery is owned by C. M. and C. A. Keep and H. D. Stewart. At the Chichamun Stone work is being

to put in. Mr. L. Moffatt was seen in reference to the interview with Mr. Aldrich, and he confirmed the values of the recent At the Chichamun Stone work is being prosecuted with great vigor and is pro-gressing rapidly. The air shaft connect-ing with the main tunnel is now com-pleted. Another shaft will be started further up the hill; this shaft will give a depth of 105 fact. A winze is being sumt 100 feet in the lower tunnel, another tun-nel is to be run 100 feet below and an available to empert the spinse. The dis assays. The Rathmullen company own 16 claims in Summit camp, crown grants hav-ing been applied for six of the claims and the remaining properties will be crown, granted before the close of the year, upraise to connect the winze. The dis-tance now run on the vein is 221 feet. tance now run on the vein is 221 reet. Shipments of ore will commence shortly. About 30 miles up Dutch creek some discoveries have been made recently which are attracting considerable attention. Cop-per ore of high grade has been brought out, and as a result a number of prospect-ors have gone in. It is said the country is easy of access, and a good wagon road can be built at a trifling expense. Dutch

feet of tunnel work to be driven on the Guinea Gold and Scottish Canadian com-An Enlarged Movement in Canadian Guinea Gold and Scottish Canadian com-pany's properties. Supplies and tools are being taken to the properties. A shaft sunk to a depth of 15 feet on the Klondike group, has exposed a lead four feet in width which contains about DEER PARK REORGANIZATION six inches of a galena ore chute which runs 180 ounces silver, 50 per cent lead and

Gold Fields Shares.

-A Fairly Lively Market.

de Into an Assessable Company

runs 180 ounces silver, 50 per cent read and \$4 gold. Development work on the Little Robert group of eight claims is showing that prop-erty up to great advantage. The lead is about five feet wide and where work is being prosecuted it contains a streak of 18 inches of solid ore besides several smaller stringers. The ore is galena and assays 441 ounces silver, 47 per cent lead and five and one-guarter per cent copper. assays 441 ounces silver, 47 per cent lead and five and one-quarter per cent copper, making a total value of \$226 per ton. Hammond Bros.' pack train of Sandon, has been engaged to move the balance of the ore lying sacked at the Beatrice mine, at the head of Mohawk creek, and work will be resumed by Beer Bros. of Nelson. A shipment of 50 tons of ore taken out last winter was made about 10 days ago. It is expected that as soon as the prop-

tural products will commence to be free and there should then result an increase deau.

The L. H. gold property, at Silverton, is now being worked. The Noonday has 55 men at work and will shortly ship a car of ore a day. The St. Louis group, Lemon creek, has been bonded by Chas. Brand of Silverton, for \$30,000. The Queen Bess has about 4,000 sacks of ore in the ore house, which will be ship-ped at once. Teamsters are now busy hauling them down. The Queen Fraction tunnel is in 50 feet and has promising indications as the ledge

c) Forks, has passed into new hands the property has been pending for some time has been a great few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there was a slump during the past few days and there were sales yesterday at from 9 1-4 to 9 12 to 12 to 12 to 12 to 12 to 12 to 13 to 14 to 9 12 to 14 to 9 12

amount involved is not known, but is understood to be a large sum. The Galena Farm is a high grade silver and lead prop-osition. The mine has been a producer for some time, and under the new manfor some time, and under the new man-agement the output will be greatly in-creased. Mr. McCune admits having made the purchase, but declined to state what price was paid for the property. He states that a concentrator of at least 50 tons capacity would be put up imme-diately, and that this would probably be enlarged in the near future. A contract has been let for work to be done on the Bondholder group, Ten-Mile summit. The contract is for tunnel work and will be a continuance of the old worknumber of shares for sale on this market. They are firmly held, only small lots being sold locally. The company's brokers sold 25,000 shares to eastern parties during the week for 15 cents. There was a sale of 1,000 on the local board yesterday for 13 cents. summit. The contract is for tunnel work and will be a continuance of the old work-ings. This property is most advantageous-ly situated and has had the Enterprise vein proven to within 2,000 feet of its lincs. Two or three years ago it was work-ed by a good force and much stock was sold, but has since , had a somewhat chequened career. 1,000 on the local board yesterday for se-cents. Good reports continue to come in from the property of the Rathmullen. The pump and hoisting plant have been in-stalled and the shaft has been pumped out and work deepening the shaft down to the 100-foot level is now in progress. The intention is to immediately add a compressor so that machine drills may be used. On the local exchange the stock is quoted at 7 asked and 6 1-2 bid. There have been sales of Rambler-Cari-boo during the week for as high as 31 cents. chequered career. Development work is now proceeding on the Arlington, Springer creek. There are three shifts of eight hours, 14 men being employed in all, and more will be put on as opportunity permits. The main shaft is down to the 130-foot level, and very little difficulty is now being met from water. A station has been blocked out Van Anda is an active stock and has van Anda 18 an active stock and has sold during the week at from 11 to 12 cents. The Van Anda smelter is turning out bullion at a rapid rate and a dividend should soon be in order. Virginia has been traded in to a large extent and the price ranges from 18 1-2 water. A station has been blocked out and drifting commenced on the vein. The shaft cut through the vein, showing on the incline 25 feet of ore, which is classed as concentrating, and is all put over the dump. Farther up the hill a level is being run from the surface, for which a new car and track have been in-stalled. Later on a third level is to be commenced near the greek to be followed extent and the price ranges from 18 1-2 to 19 cents. Winnipeg, which is one of the banner properties of the Boundary Creek country, has fallen from 31 to 29 cents. commenced near the creek, to be followed by the erection of a large concentrator, which will treat the dumps and all ledge Waterloo is selling for 8 1-2 cents. Several thousand shares of Referendum Several thousand shares of Referendum sold during the week on orders received from Eastern Canada. The management of the Big Four report that in the past week orders for 11,000 shares have been received from the cost matter before shipment. No shipment of ore will be made for some months.

Twice as good so far as the volume of business transacted in the stock market is concerned as for any previous week for a month. There was a large local demand for Canadian Gold Fields and Homestake shares, but the orders for the others came principally from Eastern Canada. The impression prevails that there will not be any great increase in the market until towards the end of August. Then the money which has been tied up in agricul-tural products will commence to be free and there should the

board of trade was held last evening at the city offices, President J. S. C. Fraser

Canadian Gold Fields syndicate and more of its shares have changed hands recently than for the six previous months. The Lake Shore property, which was recently acquired by the syndicate, has been ex-amined by three experts since it was taken over, and they all give favorable reports upon it. It is claimed by the management that within a few months the mine will be paying handsome divi-dends. The shares have an upward ten-dency and on the local board are quoted at 8 bid and 7 1:4 asked. This is an ad-vance of something over a cent over last week's prices. and there should then result an increase in the volume of the stock business. There has been considerable demand for Canadian Gold Fields syndicate and more of its shares have changed hands recently than for the six previous months. The

the preliminary survey of a road from this camp to the Velvet mine on Sophie mountain, now being made under his charge, and Captain Morrish reterred to the difficultion the difficulties of construction. After considerable discussion it was decided to allow the whole matter to stand over unallow the whole matter to stand over un-til Mr. Kirk's report was ready, when a special meeting of the board will be called by the chairman to consider it. The special meeting will probably be called some time next week. Mr. Rolt got a motion through directing the secretary to notify all members by post card of any meetings of the board at least 24 hours in advance. Meesrs. Blue, Rolt and Johnson were appointed a committee to fiterview members today and distribute the tickets for the smoking concert to be held this evening. Mr. Rolt brought up the question of the weekly returns of ore shipments from and has promising indications as the ledge is widening.
The Makefield force has been increased to 20 men.
The Ruth No. 2 has let a contract for 100 feet of tunnel.
Work has been resumed on the Neglected.
An assay obtained of the ore of the Emerald claim, situated on Pyramid creek, save values of \$71.40; 25.5 per cent copper vith a trace of gold. A 20-foot tunnel has been run on the property exposing a lead of five feet. Azurite is found on both side walls.

sales yesterday at from 9 1-4 to 9 1-2 cents. The management promises to take the shareholders fully into its confidence when the annual meeting is held on August 8th and to tell them all about the condition of the property. Then it is anticipated that there should be an ad-vance in the price of Homestake shares. The mill of the Okanogan Free Gold Mines has started and it should soon turn out a dividend for the holders of shares in this company. There is not a large number of shares for sale on this market. They are firmly held, only small lots being

pear in Thursday's paper and in the weekly of that day. Mr. Clabon asked if it would not be better to wait until the exact weights v = obtained in the first instance. Mr. A. J. McMillan said that the pub-lic were under an obligation to The Miner for the manner in which it pre-pared and published the mining news and statistics of the camp. He entirely approved of the review of the properties and the shipments which appeared week after week in the Sunday issue. The ship-ments were stated to be approximate, and after week in the Sunday issue. The ship-ments were stated to be approximate, and in any case were very close to the ac-tual figures. It would be a pity to drop this feature of the paper considering the source of the critisism that The Miner was subjected to. He therefore that source of the critisism that The Min was subjected to. He thought that no i tention should be paid to it. The me

#### ing then adjourned. Board of Trade Smoker.

kane in October. Mr. Armstrong has answered them, stating that the answered them, stating that the drilling contests are but one of the features of the 15 days' fair. The rules, he held, as adopted for the drilling contest, had met with some favor. This was shown by the fact that already double-handed and five single-handed
