The Tortures of Dyspepsia Relieved By "Fruit-a-tives"

LITTLE BEAN D'ON, C. B. "I was a terrible sufferer from dyspepsia and constipation for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try "Fruit-a-tives". In a week, the constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous." ROBERT NEWTON. 50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

YOUNG WONDER IS THE SKI CHAMPION

Ottawa Boy With Relatives in Fredericton Cleans Up at Montreal.

(Montreal Gazette.)

Ed. Condon, a lad eighteen years of age, carrying the emblem of the Cliffside Ski Club and representing the Ottawa Collegiate, carried off the honors in the first international inter-collegiate cross-country ski race held here yesterday afternoon. Condon won the honors by making the best time and establishing a Canadian record for the distance of six miles.

The race was one of the most gruelling that has perhaps ever been held in Canada, and two of the competitors faltered after crossing the finishing line at McGill Campus.

Great credit is due to the youngster who won. He started twenty-fifth and finished in ninth place, passing sixteen runners during the six miles. His time was 44 minutes and 27 seconds, giving him a margin on his nearest opponent of over two minutes. Condon is the champion skier of Ottawa and is holder of the Devlin Cup, emblematic of the Ottawa city championship.

He is also the all-round track champion of the collegiate. (Young Condon is a nephew of W. E. Seery, of Fredericton.)

GIRLS SMOKE CIGARETTES.

Furphy Among High School Pupils at Mount Vernon.

Mount Vernon, Feb. 24.—The high schools of Mount Vernon are in a greatly perturbed state of mind, because it has been stated that the board of education is going to investigate thoroughly a statement of Rev. O. F. Bartholow, pastor of the First Methodist Church of that city, and one of the most prominent clergymen in Westchester County, that has been told by several girls that certain girls students smoked cigarettes in the High School building.

In a letter in which he states that two girls confessed to him about other girls smoking, Dr. Bartholow says: "An examination of the matron and others directly connected with the girls might bring to light some interesting data. I am aware of the difficulties involved in trying to fasten upon the guilty a secret practice."

"Last night two High School girls came to me and said: 'You are right, Mr. Bartholow, about girls smoking cigarettes in the High School. We could give you names, but our classmates would shun and hate us if we did.'"

Druggists in Kansas are now required to put a label of warning on medicine bottles in all the toilet waters, perfumes and bay rum that they sell.

The Canadian Milling Industry

The Canadian milling industry has, since 1914, made progressive strides, and flour exports between that year and 1919 increased nearly five times. Today this business has an annual capacity of slightly more than 25,000,000 barrels a year and new mills are being continually added. In 1919 Canada exported 115,099 barrels of flour valued at \$521,882. By 1919 this had increased to 3,064,128 barrels valued at about \$15,000,000. In the fiscal year of 1919, 5,156,505 barrels were milled at a value of \$99,536,596.

Great Britain has been by far Canada's best customer for flour, her imports from the Dominion of this commodity, for the last fiscal year, being equal to about 60 per cent of the total, or \$56,000,000 out of nearly \$100,000,000.

Exports by countries for the last year were as follows: Great Britain, 5,672,225; United States, \$49,794; British South Africa, \$17,309; Newfoundland, \$34,147,527; British West Indies, \$6,329,527; other countries, \$34,147,527.

The trade returns for the present fiscal year show that, as yet, the exports of flour are holding their own, though the European countries are again engaged in grain growing and milling. In the last available period of five months 4,928,164 barrels of flour were exported as compared with 4,461,213 in the same period in 1918. Of these 3,912,405 barrels went to the United Kingdom; 38,423 to British Guiana; 146,596 to the British West Indies; 297,845 to France; 100,182 to Greece; 55,735 to Italy; 73,109 to Newfoundland; and 228,084 barrels to other countries. Great Britain took a little more than 1,000,000 more barrels than she did during the same period in 1918, and 1,700,000 more than in 1917.

Other departments of the milling industry look large also, as the following figures show: Oatmeal, \$1,032,567; cereals, \$1,247,249; bran, etc., \$1,592,212.

Whilst on account of the change of conditions in Europe, the export trade may fall off considerably, the Canadian milling industry by reason of the activity produced during the war is in a very strong position and should be able to hold its own in the period of competition which is undoubtedly ahead.

VERDICTS ON DEATH OF ETHEL BURRELL

New York, Feb. 24.—A jury yesterday returned a verdict for Lemma Hall, administratrix of Ethel Burrell in suits against Dr. Katherine Penick and the College of Physicians and Surgeons for conscious suffering and death of the Burrell woman. The verdict against Dr. Penick was for \$1 for suffering and for the death. As against the college, the verdict

was \$4,000 for suffering and \$5,000 for the death.

The evidence showed that Dr. Penick prescribed calomel for tonsillitis, which she diagnosed as the trouble of the deceased. Soon afterward the Burrell woman was admitted to the City Hospital on Dec. 1, 1917, and died in a few days, after showing symptoms of mercurial poisoning.

The recent tour of the Prince of Wales in Canada and the United States was officially filmed, 15,000 feet being required for the Canadian visit alone.

HIGH PRICES NOT DUE TO INFLATION

Increased Note Circulation Rather the Result of High Prices.

London, Feb. 24.—That currency inflation is not a direct cause of high prices for commodities, but rather one of the results, was the theory propounded by the Rt. Hon. Reginald McKenna, the new chairman of the London City and Middlesex Bank, at the annual general meeting of the bank. Note circulation increased because of the need for a larger quantity of currency to meet the requirements of the employers in paying higher wages, and of people in paying higher prices for commodities.

Mr. McKenna pointed out that the vast increase in deposits in the banks was mostly the result of increased loans for industrial and commercial purposes and to the Government. When a bank made a loan to one of its clients, this client paid out the money to other merchants, who deposited it in their own banks. Thus, while the original bank's deposits were not decreased, the deposits in the second bank were increased. The nation's purchasing power was increased, and, in the ordinary course of events, this would be followed by an increase in prices. This rule, however, does not always work out in connection with loans for commercial and industrial purposes, because the application of the money to production tended to an increased supply of commodities, thus offsetting the increased purchasing power of the country.

Dismissing increased deposits due to commercial loans as the serious factor in the case reason for high prices of commodities, Mr. McKenna discussed the effect of Government borrowing, which, he showed, had a tendency to increase bank deposits to a tremendous extent.
