**RECOGNITION.**  
The care of the teeth is now recognized as a necessity. In fact the large hospitals all over the world examine the patients' teeth and where it is possible put them in good condition before attempting a surgical operation. Experience has shown that the patient has a better chance for recovery with a clean healthy mouth than without it. This ought to convince the most skeptical that care of the teeth is requisite to health.

### The Will

There comes a time in the life of every man when he must leave his worldly possessions to the care of another. In anticipation of this, therefore, the first obligation resting on an individual who is possessed of property is the making of a will, and this should be done before the capacities become impaired by time or the ravages of disease.
