Indifferent base-running lost London the second game. Nine hits gave them but one run.

London plays the Hyphens three days, then to Detroit, then to Hamilton. The Hyphens will be here on June 19, when t twelve straight home games will be played in London.

After waiting for two days on account of rain the Bisons, or by adoption the Montreals, and the home team met on Saturday in a couple of games. The day was not favorable to good ball playing, the weather being cold, with a high wind which kept up for the greater part of the first game. The batting was lively on both sides, the home team securing thirteen hits for a total of sixteen bases off Dunning and the visitors piling up nine against Demaris.

The Montreals scored four runs in their half of the first inning, Andrus getting first on a scratch hit and stealing second. Rooks was hit by pitcher and given his boase, after which Andrus started to steal third and Murphy in his endeavor tout thim off threw over Reidy's head and Andrews scored. Burke was sent to first on balls and Pettee followed with a three-bagger into right field, bringing Rooks and Burke home. Pettee scored on Connor's sacrifice to Hiland. Their little right fielder made his second hit in the fifth and it to Roche and Andrus came home. Rooks stele second. Rooks followed him with a hit to Roche and Andrus came home. Rooks stele second and third in good style, when Coughlin flied out to Hiland. Burke sont another slow fly in the same direction, which was also taken care of by Hiland. Rooks trying to score was put out at the plate on a sharp play by Hilland, Lutenberg and Murphy. They got two runs in both the seventh and eighth on hits by Andrus, Rooks, Dunning and Oldfield, sassited by a base on balls and errors by Roche and Hiland opened up the fun in the first runs in the first half of the game. Hiland opened up the fun in the first man and Rittreege. Umpire—Yauch.

The scond Game.

Promptly at the close of the first game, Umpire Currie called play and the second game was commenced, Jones going into the box for the Londons and Shellerman and Smith forming the battery for the visitors.

Meyers, the new man signed as pitcher by the Londons, took Roche's place at short and accepted his solitary chance. He did not pan out very well at bat, however, striking out twice out of three times at bat and going out from pitcher to first on the other occasion. The Londons continued to bat hard in the second game but failed to hit at opportune moments. They secured their run in the fifth on Hilland being struck by Shellerman and sent to first. A hit by Leighton and Connor's fumble of Friel's hit brought Hiland home. "LOOKING BACKWARD."

Bro, Brent Discusses Edward Bellamy Work at a Meeting in Labor Hall.

Labor Hall was well filled yesterday afternoon with an audience which assembled to hear Bro. Joseph Brent discourse on the subject, "Bellamy's Fool's Paradise Ex-posed." The text was not at all suggestive of the substance of the lecture, and Mr Brent evinced himself a warm admirer o Bellamy's theories as laid down in his great

work, "Looking Backward." Mr. Brent, in his opening remarks, said

of Ambition, Unfitness to Marry, Stunted Decoment, Loss of Power, Pains in the Back of men who were to wield the destinies of the world? It was to be regretted that too often the school teachers used their profession as a stepping-stone to a higher position in a worldly point of view. There were three points laid down by Ballamy on which this system rests. First, the right of every man to the completest education the nation could give him on his own account, as necessary to his enjoyment of himself. Second, the right of his fellow-citizens to have him educated, as necessary to their enjoyment of his society. Third, the right of the unborn to be guaranteed an intelligent and refined parentage. The hidden resources of this earth under the system as laid down in this book would, by only two hours' work per day, yield each individual an amount of money equal to that of a person enjoying the comforts and luxuries of life on an income of \$10,000 per year. There was no necessity to fear that this grand result could not be brought about. Bellamy thought these things will be realized in the year 2,000.

It has been decided to carry these meet.
