The reason of the shortage is the rainy weather of the spring. The output of the United States in beans is 7,000,000 bushels annually, so Michigan raises over half this amount. Last year 1,000,000 bushels were imported. Prices have not gone up yet, but there is likely to be an advance shortly.

A BIG OIL FIRE IN TEXAS The Beaumont Field Threatened

Big Tanks Explode-Little Chance to

With Destruction.

Check Flames. Beaumont, Tex., Sept., 12.—The oil field is on fire, and judging by the great volume of smoke which is flowing in from Spindle Top, there is grave danger that great loss will be sus-tained, if the field shall not be entirely

destroyed. The fire started early in the evening in some waste oil along the Texas and A. Sabine tracks, and burned about 60 feet of trestle. This was got under control, and it was believed that all danger had passed, but in the meanwhile the fire in some way had been communicated to the field and several huge settling tanks, containing thousands of barrels of petroleum, have already exploded, and others are reported as being in the direct line of the fire, which has spread over a wide

area already. The ground is saturated with oil. and there is no chance for stopping the progress of the flames tonight. The fire is spreading rapidly, and it is believed that the whole field will be

ignited before daylight. A telephone message from Gladys, which is the station at the oil field, says the whole of the Keith-Ward tract, embracing several acres and containing a large number of wells, has been burned over, and it is be-lieved that some of the wells have caught. The big tanks belonging to the Higgins Company are burning. At 1:30 a.m. the telegraph operator

at Gladys says he fears that he will soon be compelled to leave his post and all means of communication will be cut off. It is reported that two men have been seriously burned. The workmen on the hill are standing about unable to do anything even towards protecting that portion of the field which is not yet on fire. The entire apparatus of the fire department is being loaded on cars to be sent to the field, and a large num-

ber of people will go on the train.
