the scientific and medical ones, the only one I ever knew to treat on the medical side of the question was that by the late Rev. M. Stafford of Lindsay. That gentleman by his masterly treatment of that point in the discussion showed clearly that he had an intelligent idea of the matter. His loss to the total abstinence cause is greatly to be regretted. es Sullivan, another of the gang who beat and the old man, Robert Little, in Shipley's den bard street lest Saturday night, was arrested ective Burrows yesterday.

The box makers of Firstbrook Bros held their annual dance last night at Germania hall. A novel event in connection with the affair was a box-making contest between the employees, the prizes being a wold-headed cane and a meerchaum cigar holdor. The test was for 10 boxes, 37 mails in each box. Wm H Hutchison was first, in 17 minutes, Joseph Loughman second, 172 minutes, Wm Burke 194, thus Burke 194, The judges were Wm Firstbrook, Albert Smith and Wm Bartrand. Win Pirstbrook, Albert Smith and Win Bartrand.
The musical season of 1882 3 was most brilliantly inaugurated last Thursday evening by the Litta Grand Concert company, who gave the initial concert since their reorganization at Central music hall. The large hall was fairly thronged by a magnificent audic co. The doors were besieged half an four before the concert began. Every available inch of standing room was eagerly utilized. The stallways were crowded, and the legend "breathing room only" ought to have been displayed at the portals of the hall. It is safe to say that a finer and ence has eldom attended a musical entertainment in Chicago, and Parti, Gerster and other luminaries of transcend-nt brightness have visited us many times.—Chicago News Letter.

points, I feel the more and more convinced that it is my duty to oppose the use of alcoholic drinks in every form and quantity. I have not a particle of confidence in them, and am plessed to see that there are medical men in this country who are manly enough to take the side of total abstinence and follow in the footsteps of the famous physician of London, Dr. B. W. Richardson, and of other eminent British and American physiologists and practitioners. And here I would direct attention to the fact that physiologists have scarcely ever had a dispute about the effects of alcohol upon the human body. They are singularly unanimous as to the injury alcohol, even in minute quantities, inflicts upon the tissues of the normally healthy individual who may have partaken of it. The dispute, whatever it may amount to, is with reference to its utility in certain forms of disease. Dr. Ryder says "that not one of the ministers, so far as I am able to learn, referred to the medicinal use of this vile poison." With regard to this I have to state that of the numerous lectures on this subject heard by me, apart from the scientific and medical ones, the only Faust, Martha, Il Trovatore.
