**Trudging For the Wash.**  
The Portuguese country people as a usual thing have great physical endurance, doubtless as a result of the "survival of the fittest" for many generations. The laundry workers are an example of this. People come in from long distances to get soiled clothes of city customers. The clothes will be placed in big panniers on the family donkey, and the peasants will start back late in the afternoon. Some of them will travel all night, and it will be sunup before they reach their homes, many miles from Lisbon or Oporto. A day or two later they are trudging back to deliver the clothes, now spotlessly clean, and to get another lot from the same patron. Many a countryman and his wife take a jaunt of fifteen miles or more, which makes one think that there might be many who could rival the feats of Weston and O'Leary as walkers if they tried.—Christian Herald.

**An Early "Trust"**  
As an example of trusts and monopolies prevalent even in that early day it may be mentioned that in 1750 one Benjamin Crabb obtained the exclusive right to make sperm candles in Massachusetts for fourteen years. A year later, however, a factory was started in Providence, R. I., and within the decade there were eight factories in New England and one in Philadelphia. Their output greatly reduced the price of candles, which not long before sold for 5 shillings a pound. In those days \$1.25 was worth fully three times as much as it is now.—N. Hudson Moore in Designer.

**The Sixteenth Century Critic.**  
"But why, prithee," contended the first critic, "should this new playwright, Shilspur, have introduced a comic gravedigging scene into his tragedy, perdie?"  
"The easy of solution, by hen," answered the second critic. "Our author hath put in gravediggers for the purpose of unearthing a plot! Boy, a cup of sack!"  
"Wit was crude in them days.—Cleveland Leader.

**A Discovery of Vast Importance**

It is Now Admitted That Bronchitis, Asthma, Catarrh, Coughs, and Colds Can Only Be Quickly Cured By Mixing a New Medicine With the Air You Breathe.

Scientists acknowledge that medicated air treatment is the only treatment that will cure these diseases, and that stomach medicines are worse than useless.  
Catarrhozone air treatment has been found to be the most effective way to cure all diseases of the throat, lungs, and nasal passages. Its action is so prompt that in less than an hour an ordinary cold is cured, and after a more thorough use of Catarrhozone, Bronchitis, Catarrh, and all diseases of the throat and lungs are completely cured.  
Catarrhozone is a very simple and powerful method of treatment. You simply breathe it through the inhaler and it immediately passes over every air cell of the throat, lungs, and bronchial tubes, curing and healing as it goes.  
Catarrhozone treatment affords little drops of healing for sore places in the lungs, throat, and nasal passages.

**WASHING FURNITURE.**

**Easy to Restore Tarnished Pieces to Original Freshness.**  
"Very few people know that furniture ought to be washed," said a salesman in the furniture section of a large department store. "Yet," he continued, "it is the best thing one can do to keep furniture looking as well as it should. One should take a bucket of tepid rain-water and make a suds with a good pure soap. Then with a soft piece of cheesecloth all the woodwork should be washed. It is astonishing how much dirt will come off. A second piece of cheesecloth should be wrung dry out of hot water. On this should be poured a tablespoon of first class furniture polish. The heat will spread the polish through the cloth. Next the furniture should be gone over with the second cloth. There will be no need of putting on more polish, for that much will do all one needs. Too many persons make the mistake of using too much polish and leaving it thick on the furniture, where it looks dauby and where it gathers more dirt."  
There is furniture in homes today that is cast off because of its appearance when it might be brought back to its original freshness by this simple process of washing. Many persons do not know that a fine bit of mahogany is improved by careful washing, and hundreds of pianos have never been more than dusted in years. A square of cheesecloth for the washing and another for the polishing will do the work, and the result will well repay the effort.—Indianapolis News.

**HOT DRINKS.**

**If Taken Above 130 Degrees They Injure the Stomach.**  
Many people without realizing it are in the habit of drinking tea at much too high a temperature. Sir Henry Thompson points out in his book on "Diet in Relation to Age and Activity."  
"Few persons are aware that they habitually swallow hot liquids, tea especially, at a temperature which if applied to the hands or feet would inflict painful scalds. Most tea drinkers take it about 140 to 145 degrees F., which the mouth bears very well if slowly sipped, while the cup itself is too hot to be held by any hand."  
"But the habit of swallowing such tea is injurious to the stomach, and it ought not to be taken above 130 degrees or so. Again, water at 120 degrees, which feels a little more than lukewarm in the mouth, causes severe pain if the hand is dipped in it and cannot be endured."  
He has, however, some good words to say for the early morning tea.  
"This morning tea in any case should be taken at least an hour and a half before the first meal of the day. For many years I have been accustomed to write for an hour every morning in bed after tea, as I am doing at this moment, and at no time do I find the brain clearer for work, while the appetite for solid food is excellent when the hour for breakfast arrives."

Berlin, April 26.—Israel Snyder, of near Crosshill, one of the veteran farmers of North Waterloo, was found dead this afternoon in the furrow of a field that he had been plowing in. A passerby saw the span of horses working their way across the field with the unmanned plow and the body of the dead man was found where he had dropped dead owing to an attack of heart failure.  
EXTERNALLY OR INTERNALLY, IT IS GOOD.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue as few liniments do, touching the seat of the trouble and immediately affording relief.
