The voting on the \$10,000 bonus livlaw in favour of the Montreal Merchants Manufacturing Company, at St Henri, was in progress yesterday and to-day. The poll stood at noon - For the bonus, The voting is con-04, agninet it, 1 fined to proprietors, of whom there are not taken much interest in the matter, if the number of votes cast be any cuterion Much gratification is expressed among the residents generally at the result of the rote, since they feel arsured now that nothing can prevent them having their factory with all attendant advantages. Work on the foundstions will begin on Monday - Montreal

Mesara Adam Burne, F. G. Parker, T. E. Kenny, J. F. Kenny, S. M. Brookfield and others interested. The Victoria and W. I. Lowell met Thursday and Poundry is owned by the Consolidated E. Kenny J F Kenny, 8 M Brookfield talked over the project of starting a cotton factory in Hallfax. They decided to call on twenty leading citizens, and if they succeed in getting these to subscribe for organizing the company. A short time was spent Feldsy morning in soliciting stock, and the result was that \$30,000 were subscribed. It is under-stood that the capital will be fixed at \$200,000; that \$150,000 of this will be subscribed by the projectors and their immediate friends and that the remaining \$50,000 will be offered to the public. Mr. George Munro, of New York, who offered to take stock to the extent of \$12,000 in the enterprise when first mooted, has been communicated with.

No one thing advances the material progress of a town in a greater degree, nor gives that advancement a more permanent stability, than the establishment of manufactories. As their business widens and enlarges the expenditure of capital, the furnishing of employment, and the attention they attract to the town in which they are located all contribute toward the general welfare. Nearly ten years ago William Fraser & Son started a foundry in Petrolia, which has been gradually but surely working itself upward in the business scale until to-day it occupies a prominent position among the iron working establishments of Western Ontario. Recently Mr. William Preser dissolved his connection with the firm, and since that time it has been reorganized by a co-partnership established between Mr. Geo. Fraser, the junior partner of the old firm, Mr. Wm Stevenson, of the Petrolia Boiler Works, and Mesers. McKee & Marwick, the well known machinists. The formation of this combination of the three firms has under the title of the Petrolia Iron Works.—Petrolia Topic

The Bridgetewn Monitor learns that Mr. McNutt expects to be at work early this month-his can making machinery bas been ordered, and will arrive short ly. Operations will then be commenced. The seed corn bas arrived, and farmers are requested to call for it for planting according to agreement. Hr McNutt has ordered twenty bushels of this seed corn, and wishes to have the whole amount planted in the valley this season, if possible, as he is prepared to handle 100,000 cans as well as half that number. In addition to sweet corn, he also wishes the fartners and gardeners generally to raise all the tomatoes and peas possible, and he will hav enough for them to make it pay planters. As these articles, as well as sweet corn, are both easily raised, there should be no difficulty in securing an unlimited supply, if farmers will only view this enterprise in the right light, and show themselves alive to their own interests by helping forward by every means in their power an enterprise which will add just so much more to the wealth of the valley in proportion as its promoter is supported Blueherries will also be canned and people from "out south" will now only need to bring their berries to the door of the factory, deliver them, and receive their cash on the spot

meeting was held on Friday last, in the City Bail, to take preliminary stops for the formation of a joint stock company to foreign bottoms. The merchandise statement is made (unofficially, of erect and operate cotton mile in this imports for the number were \$37,450,000, many who are toquiring and writing to hearly all our influential citizens being against \$17,294,00, in April, 1880; and the secretary on the subject. present. search of a building in wheh to establish a cetton spinning factory. He was met at the depot by Ald Dickson, who, In company with the Mayor and several other gentlemen, drove to a number of places, including Victoria Foundry, Pin-up for some time to come, and the transless of the sound that the transless of the sound street, and Martin's and A L. Smith's foundries on Mill Street, either Smith's foundries on Mill Street, either 1st of July, when work begins -Heof which would answer the purposes re- ton Spectator quired of them, with some slight alteratione. The first samed, however, was preferred by Mr Shaw He was also driven to a splendid site above the Canifton Crossing, where water power could be obtained, but he preferred steam power, and is anxious to establish his business at once, as the demand for the goods he purposes manufacturing is con-stantly increasing. Mr Shaw's offer is considered very favourable by merchants Bank, and action has been taken to purchase it A consultation was held again last night with Mr Shaw at which Ald Dickson, Starling, the Mayor and 35,000 each to immediately take steps Measus Thos Ritchie, Jan Honnessy, U an article of food. In 1871 the 15 for organizing the company. A short F. Smith, Thos. Kelso, and a number of naterit was granted to Mr. W. U that other gentlemen were present. matter was pleasantly and satisfactorily discussed, and there seems to be little or no doubt that the factory will be established here. Another meeting will be beld on Monday next. We withhold the publication of the terms on which Mr. Shaw wishes to establish his factory until something definite is known; but we can assure our readers they are quite liberal, no bonus being asked .-Belleville Ontario.

> The Montreal Witness says. The remarkablu invention, the Watson electric semaphere signal, to the exhibition of which in this city reference was made in our columns yesterday, was the fruit of the scientific labours of the late Rubert Watern, jr., of this city, who died early in 1879. Mr. Watern was well known as an electrician, and had much to do with introducing into Montreal the Canada District Telegraph system. He completed the invention of this electric semaphore, it might be said, on his death bed, for he died of consumption, and he left the semaphore as a legacy to ble mother, Mrs. Watson, of Sherbreeke street, who has after two years of such battles and difficulties as are only known to those who manage the infancy of patente, had this signal brought to its present state of perfection. The inechine is patented in the United States, Canada and Great Britain. In January last it was shown in New York, and was highly spoken of by Mr. Pope, the electrician, and the Eric Ballway Company have expressed their willingness to give it a trial at l'ort Jarvis station. In March inspected the signal yesterday and expressed approval of its merits. Mr Nessitt, a Toronto electrician, has had the 'All right,' said he, 'I can stand it if superfutendence of the manufacture of you can'. He got the instrument and the patent, and has been of great assistant the patent, and I can tell you wint it is, tance in working out some points which Mr Watson had only roughly indicated before his decease. This semaphore can be worked miles away from the operator's room.

On Monday the workmen broke ground for the erection of a building for the Canada Canning Company, at the corner of Catharina and Liberty streets. Last full some gentlemen interested themselves in the formation of the Ilamfilton Fruit Canning Company, and posed erecting a large wooden building at the corner of Duke and Queen streets, whorein to go extensively into the can ning of fruit and vegetables this acason Before the advent of the National Policy such an enterprise was impossible in Canada, as the market was fully supplied by large American firms, who had a monopoly of the business, which grew more and more extensive each year When the Conservatives camo into power and the National Policy tariff was promulgated a large duty was placed for conspiracy. The damages an lail a upon cannel fruits so licavy in fact as \$10,000 to make it possible for Cannillan manufacturers to go into business and riake a fair profit, and at the same time undersell their American competitors And l'ursuant to notice given, a public this is what the Canada Canning Company of Hamilton proposes doing. The present duty on a three pound can of
