FOUNTAIN PENS you can depend on.

THEIR GOOD POINTS.

These Fountain Pens are made from the best vulcanized Para Rubber, and are fitted with a selected heavy 14-karat gold pen, specially strengthened in the parts subjected to the most wear and spring. The pen is tipped with the best quality of iridium, as hard as a diamond. A special feature of this pen is the attention given the fitting of the screw section and cap, which is essential to insure a pen that will not leak.

Our feed is a **very simple underfeed** working freely and automatically by capillary attraction. It is the same feed as that of a celebrated maker whose patent having recently expired, enables us to offer you a fountain pen in every respect identical with the pen until now considered to be the best on the market, but which we offer at half the price.

THE COPP, CLARK CO., LIMITED
