ACETOZONE IN INFANTILE SUMMER COMPLAINTS

**Most powerful intestinal antiseptic known.
Freely ingested in aqueous solution.
Potent against the disease, yet harmless
to the patient.**

IN the summer complaints of young children the most rational agent is **Acetozone**—an agent of greater germicidal potency than mercuric chloride, carbolic acid or hydrogen dioxide.

RESULTS.

Discoloration and putridity of the stools disappear. Diarrhea is checked. Temperature falls. Pain and inflammation subside. Vomiting is controlled. Irritability is succeeded by rest and refreshing sleep.

Supplied in ounce, half-ounce and quarter-ounce bottles; also in vials of 15 grains, 6 vials in a box.

LITERATURE FREE ON REQUEST.

MILK OF BISMUTH GASTRIC SEDATIVE AND ASTRINGENT

**Every possible care used in its preparation.
Contains no arsenic or other impurity.
Agrees with the most sensitive stomach.**

IN the treatment of the various forms of gastritis, gastroenteritis, gastric ulcer, enterocolitis, diarrheas, dysentery, etc., *Milk of Bismuth* (P., D. & Co.) is especially serviceable.

ADVANTAGES.

Milk of Bismuth (P., D. & Co.) is to be preferred to other bismuth preparations for this reason: it presents the hydrated oxide of bismuth in a state of very fine subdivision, which insures its thorough distribution over the alimentary canal.

WRITE FOR DESCRIPTIVE CIRCULAR.
