Export Contact:

Mr. Ed Karpinski, President

Store-Rite Farm Systems produces the Unicone Hopper Floor. These bin bottoms are perfect for new or existing round steel bins. The easy to install fibreglass cone and concrete ring foundation gives all the benefits of a hopper at a lower cost.

Besides a manageable bin height, these hopper floors have many features that farmers like; they are clean and maintenance free, lightweight, and easy to install at a lot less expense.

Customers are served by a network of over 100 dealers across Western Canada.
