Toronto, Ontario
M8W 1T1

Tel: 416-255-8563

Fax: 416-251-6117

Export Contact: Mr. Cyril J. Muhic, Regional Sales Manager

Darcor Casters Incorporated manufactures a complete line of high performance casters and wheels. Specializing in hospitals and institutions, the firm's high quality ergonomic products are being increasingly specified by safety conscious managers. Low rolling effort and long life are but two of the qualities that Darcor offers. The Darcor neoprene wheel is well suited for hospitals and institutional use. It is non-marking, non-staining, shock absorbing, and resistant to wax and cleaning solutions. This wheel works well on both hard floor and carpet areas, and resists picking up lint and fibres.

Darcor Casters Incorporated features a complete line of sanitary sealed casters. These casters are equipped with sealed ball races, providing easy access for lubricants in the swivel heads and wheels, and they are excellent for wash down areas. The company has offices in Los Angeles, Nashville, Buffalo and Toronto, with distribution throughout North America and the world.
