THE COLONIAL LIFE ASSURANCE COMPANY

Has been established for the purpose of extending to the Colonies of Great Britain, and to India, the full benefit of Life Assurance; and for the purpose of giving increased facilities to persons visiting or residing in Foreign Countries. The Company is registered and empowered under the Act of Parliament 7 and 8 Vict., cap. 110.

The general management of the Company is under the direction of persons who have been long practically acquainted with, and connected with the working of Life Assurance Institutions; and it has been the study of the Directors to afford all those advantages to their Policy-holders abroad which are commanded by Assurers in this country.

For the purpose of giving increased facilities also in the Company's transactions, the Directors have formed Local Boards of Management, and Branch Offices, where Assurances may be effected and Premiums paid, in the different places to which they have extended their business.

THE CAPITAL of the Company is £500,000. All the Directors in Great Britain are Shareholders of the Company, and those appointed in the Colonies are bound to take a similar interest in the Institution.

THE RATES which the Company have adopted, have been formed on the most correct observations which exist as to the value of life in those countries to which the Company have extended their business.

THE PROFITS of the Company will be ascertained and divided at certain intervals: the First Investigation and Division being to be in 1854, when each Policy having a right to participate in the Profits, will share in the Fund to be allocated for Division among the Assured, according to the Profits which the Company may calculate to have arisen on the particular class of Risks to which such Policy may belong.
