The playhouses held under option to purchase are situated in the busiest shopping downtown district, while others are situated in the north, east and west end sections of this city. It is expected that within a few days the circuit of theatres will be completed, with playhouses in operation in a number of the leading towns within a radius of 200 miles of Toronto. Each of these theatres is earning big profits, and no stock enterprise offered for public subscription recently has, in our opinion, the practically assured profits as has the Canada Moving Pictures, Limited.

The general public has made the Moving Picture Industry what it is to-day, and for the first time the public is offered an opportunity of reaping the financial benefits which promise to grow more rapidly in the future than in the past.
