HOME ECONOMICS

It is odd to think that every first-class manufacturer of furniture in this country and in Great Britain is today busily engaged in reproducing the designs of the eighteenth and early nineteenth centuries.

The Baby Who

A craving for unnatural food is commonly observed in cases of that type of anaemia called chlorosis ("green sickness"). It is likewise a frequent complaint of expectant mothers. When the craving leads to the eating of abnormal things, such as soil or earth, it may give rise to suspicion of the individual santity or mental health, but in truth earth eating does not warrant such suspicion. A great many babies of whose mental normality there can be no question do just love to eat the earth—probably in-

A great many babies of whose mental normality there can be no question do just love to eat the earth—probably inheriting a very hearty appetite from one or another side of the family tree. All of these unusual cravings are known by the name of pica.

Clay eaters in some portions of America and other countries have been played up so much in the Sunday papers that everybody has heard of them. Very often these people have a marked anemia, due to hookworm infestation. The larvae of the hookworms are taken into the system along with the clay or soil and in the course of time developed into adult hookworms in the small intestine, where they remain and produce the anemia. sometimes the anemia increases the abnormal craving for the anemia, sometimes the anemia increases the abnormal craving for

Infants with this craving for earth
will make assaults on mother's flower

Perhaps there is a physical basis for
the queer appetite in many such cases.
An infant 30 months old, raised on condensed milk, is a constant threat to his
father's little parcel of real estate. Condensed milk cheats a baby badly all
around; it cheats him of vitamins, for
one thing, and a baby can't develop normally if his food does not contain these
accessory factors; it cheats him of fat,
for another thing, since condensed milk
contains practically no fat as diluted for

CHILDREN OF ALL AGES

Children of all ages—whether it be the new-born babe or the growing child—have to be constantly guarded as to their health. Upon the good health of the little one largely depends his strength and usefulness in after years. Eaby's Own Tablets are the ideal home medicine for children of all ages. They are a gentle but thorough laxafive which are absolutely guaranteed to be free from opiates or other harmful drugs and which may be given to the youngest child with perfect safety and beneficial results. Through their action on the bowels and stomach they banish constipation and indigestion; break up colds and simple fevers and make teething easy. Mothers, you can make your little ones well and keep them well by just keeping a box of the Tablets at hand and by giving an occasional dose to the baby to keep his little bowels regular and his stomach sweet. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams 25 cents a box from The Dr. Williams Medicine Company, Brockville, Ont.
