

AUGUST.

On the 22d of this month the Sun reaches the constellation Virgo, or the Virgin, being the sixth sign of the Zodiac. Astraea, the daughter of Aurora and Astraus, the Titan, was esteemed the Princess of Justice, and the heathen poets say that in the golden age she descended to preside over the earth, but became at last so disgusted with the wickedness of the world, that she returned to Heaven and became the constellation now called Virgo.

To Correct Damaged Grain.—Put the injured article into an oven, from which the bread has been just drawn. Spread it in a bed, of from three to four inches in thickness, and stir it frequently with a shovel or rake, to facilitate the disengagement of the vapour. In ten or fifteen minutes, according to its humidity, withdraw it; when perfectly cool and aired, it will be restored to its wholesome qualities.

From the 1st to the 12th of this month the weather will be intensely warm, with occasional heavy thunder storms.—After that period, to the end of the month, the heat will be more temperate. The weather during the entire of this month will be most favorable for agricultural purposes.

Third Quar. 4d 1h 43m morn. First Quar. 15d 4h 55m even.
New Moon. 12d 5h 49m morn. Full Moon. 26d 8h 20m morn.
