ELECTRICITY GAVE LIFE TO DEAD BABE.
Child Which Apparently Died Soon After Birth Saved by New Method.
...DETROIT, Aug. 16.—Dr. James Brien of Essex, Canada, a few days ago, by means of electricity, was successful in restoring to life a child which had apparently died shortly after birth. The doctor tells the following story of the achievement.
"My partner, Dr. Doyle, and myself noticed immediately after birth slight pulsations in the form of the infant, but they gradually grew fainter and fainter, until not a sign of life remained. In the mean time we had resorted to all the known methods of resuscitation such as dipping the child in warm and cold water and rubbing its body with sweet oil.
"All these remedies failed to revive the apparently lifeless babe, and we had almost given up hope when it occurred to me to make a test of the electric current as a last resort. I had never heard of any such experiment being made, and only decided to try it when I was certain the last spark of life had fled, and that the electric current could at least do no harm.
"It was fully fifteen minutes after birth before the first current was employed. For the first ten minutes there was no sign of life. At the end of fifteen minutes, during which applications of both the galvanic and faradic currents had been made, the infant displayed slight evidences of life. We increased the current persistently, and in ten minutes more were rewarded by seeing the child breathe naturally. The heart began to pulsate slowly but regularly, and soon took on its normal action.
"The child is now doing well. I am prepared to prove these facts by sworn testimony."
"Dr. Brien is one of the oldest practicing physicians in Western Ontario. He has represented Essex county in parliament at Ottawa for several years.

FAR FROM HOME.
Visitor from Norway Talks of Lumbering and Politics.
...Andreas J. Jacobsen of Fredericksburg, Norway, is at the Dufferin Hotel. He has been touring the United States for some time and now intends to visit the principal Canadian cities.
"Mr. Jacobsen is largely interested in the lumber lands of Norway. Pine and spruce are the prevailing kinds out on the market. The trees are smaller than those of British Columbia, he says. They resemble in size the lumber of New Brunswick. They are sawed into deals and planks, and exported to England and France. The forests there, he says, are being well preserved, and it is not probable that Norway pine and spruce will become extinct for the purpose of lumbering on a large scale. The large trees only are cut, and planting is continually going on. While travelling through Michigan he learned that the lumber of that state was practically all cut. That would not happen in Norway.
"Mr. Jacobsen said that according to letters he recently received from home there would be an election this fall in

CONSTIPATION THE FOE OF HEALTH AND BEAUTY

It is quite likely you are doctoring for the wrong thing. Or perhaps you are taking medicine for a trouble you really have but which has been brought on by that common ailment—constipation.
Whatever your trouble, do you find it stubborn to treat? Do you wonder why you do not get cured? Are you sometimes almost discouraged?
Try doctoring your bowels. Don't imagine because you seem regular, or maybe once a day for a time, then a day skipped, and so on, that you have healthy bowels. Everybody needs a gentle laxative occasionally. Where you think you may be all right, you may be all wrong. Likely as not it is the cause of something else you are suffering from.

LAXA-CARA TABLETS

do not purge or strain. One after each meal acts upon the intestinal canal gently but surely, cleaning it out completely. This gives every other bodily function a free and healthy action. It allows Nature to take her course, where she has been obstructed before. Even though you are what you imagine reasonably regular, that is no sign you do not need LAXA-CARA TABLETS.
Try them and know that there is one sensible and effective cure for clogged bowels. The chances are that is the seat of the trouble you are suffering from. They will do you good, anyway, and will probably show you the truth of some things.

YOUR DRUGGISTS SELL LAXA-CARA TABLETS FOR 35 CENTS PER BOX, OR SENT POSTPAID ON RECEIPT OF PRICE

Dan Patch Easily Broke the World's Record for Pacers.

NEW YORK, Aug. 19.—Dan Patch broke the world's record for pacers at Brighton Beach today by pacing a mile in 1.59. It was a magnificent performance and seemed an impossibility. The wind and track considered—Never Lost a Race.

KIDNAPPED A WOMAN.

Wife of Wealthy Farmer, Eluded Attempts to Hold Her for \$50,000 Ransom.

DAVENPORT, Iowa, Aug. 18.—Reports come from Sunbury, Iowa, of the kidnapping yesterday of Mrs. John Hillrow, wife of a wealthy farmer, followed by an attempt to extort \$50,000 ransom from her husband. Mr. and Mrs. Hillrow were decoyed from their home by a man who said their son was ill in a nearby town. While driving along a lonely road with the stranger, it is said that Hillrow, who is aged and feeble, was thrown from the buggy and taken to a farm house in the neighborhood. Meantime her husband had communicated with the county authorities, but no trace of the kidnapper could be found in a critical condition from exposure.

A SINGULAR FOREST.

(Philadelphia Record.)
The most singular forest growth in the world is encountered in the Falkland Islands, a dismal region constantly swept by a strong polar wind. What appears to be weather-worn and moss-covered boulders scattered about, and when one of these curious objects is seized in an attempt to overturn it strong roots are found to hold it down. The "patient" being, in fact, native trees which the wind has forced to assume this shape. The wood appears to be a twisted mass of fibres almost impossible to cut up into fuel.

A OURE FOR LOCKJAW.

Common Salt Solution Injected in Victim's Veins Produces Wonderful Results.

CHICAGO, Aug. 18.—A cure for lockjaw, it is said, has at last been discovered. It has been tested and proved. The discoverer of cure is Dr. Samuel A. Matthews, professor of pharmacology in the University of Chicago. In brief, Dr. Matthews' treatment of the dread disease consists of an intravenous injection of salt solution. The treatment has just been tried for the first time on George Newman, an 11-year-old boy. The patient had an acute attack of the disease and was in the last stages when Dr. Matthews was asked to try his discovery; as a result the boy is able to sit up. Physicians pronounce the cure a wonderful one, and say that Prof. Matthews has made a discovery which will revolutionize the entire practice of medicine in cases of acute poisoning.

LEFT BIG FORTUNE.

Col. Geo. T. Cline, of Maryland, Died Worth Millions—May Have Heirs in Provinces.

Now it is the Cline family that will enter into the struggle for millions, and it is more than probable that the St. John Clines are among the heirs of Col. George T. Cline, who died a few weeks ago and was buried at Frederick, Md., the scene of his boyhood. The veteran pilot, Richard Cline, was seen this morning, but he could not say off-hand if he was among the lucky ones that would come in for a share. As Pilot Cline, however, related some of the early history of his family, it looked as if he "was one of them." Pilot Cline said, so far as he remembered, his family went from England to Philadelphia and there made their home. His father had several brothers, and when the trouble came between King George and the colonists, his father took the side of the king, while the others espoused the opposite side. After the trouble was over, Pilot Cline's direct family came to St. John and afterwards removed to St. George. There was a family of twelve children. Capt. Cline said his father afterwards visited Philadelphia to see his relatives, and he used to tell his children of his nephew and niece in the United States. Many of the descendants still reside in Philadelphia. Although he was not certain, Pilot Cline thinks it might be possible that Col. George T. Cline was a son of one of his uncles.
The American papers say: "Colonel Cline was eccentric, and when he died some weeks ago the discovery that he was so wealthy created quite a stir among the Clines. The estate may be in excess of the three millions when his accumulated papers have been studied. He left a will sharing the property among relatives.
"A Chicago woman is expected to set up a claim of a common law marriage, but to offset this claim papers will be submitted to show that in his correspondence the millionaire frequently used the term "bachelor" in connection with his signature.
"In his earlier years Colonel Cline was a singularly proud man. He dressed well, kept himself scrupulously clean and loved to talk of the distinguished family of which he was a member. His mother was one of the family of Maryland and his father was a soldier in the war of 1812. Upon these two facts in his personal history he dwelt with almost affectionate emphasis. Search as one will he can find no romance and not much sentiment in the life of this old miser and recluse. He was a lover of certain kinds of music, but cared little for the classics."
The Cline family in Halifax, the Echo says, may be among the heirs—Globe.

A NEW CROP OF CORN.

Isn't very hard to raise with the aid of tight boots. Best remedy is Putnam's Painless Corn and Wart Extractor, which cures in one day. Refuse a substitute for Putnam's, it's the very best.

A SECOND MISFORTUNE.

After considerable effort the tug Blomark, belonging to Emory Sewell, which ran upon the pier at Ormoco river Friday and sank, was floated Saturday by two large scows placed on either side of her. She was taken in tow by a tug to be brought to St. John for repairs. They had not proceeded any further than the mouth of the Ormoco river when the Blomark ran aground, and all efforts to float her or tow her off were unsuccessful.

WOMAN'S WAY.

She—Now that I have only confessed my one indiscretion to you, what do you say?
He—That you have committed a second.—Brooklyn Life.

BOSTON LETTER.

Will Celebrate Sunday October 4th as British Day.

Dr. Charles O. Tupper, formerly of Cumberland Co., N. S., Will Get a Divorce from His Wife, a Yarmouth Lady.

Recent Deaths of Former Provincialists—Evening Transcript Discusses the Political Situation in Canada—Latest Quotations in the Lumber and Fish Markets.

(From Our Own Correspondent.)
BOSTON, Aug. 18.—The farmers employed by the city of Boston are engaged in reaping the heavy crop of grain on Boston Common. For the first time in the history of the city the common was ploughed up and cultivated. Oats, buckwheat, rye and Hungarian millet cover twenty acres of ground.
The executive committee of the committee of 100 British citizens of Boston and vicinity, who are planning to co-operate with the Ancient and Hon. Artillery Co. in the entertainment of the Hon. Artillery Co. of London early in October, have about completed arrangements. A meeting was held last night to perfect the plans. It was decided to celebrate as British Day Sunday, Oct. 4, when British residents of Boston and vicinity will have an opportunity to participate in the reception of the distinguished visitors. Luncheon will be served at the American House at 2 o'clock p. m., and at 3 o'clock there will be a parade in which over 1,000 men have signified their intention of taking part. Col. Courtenay of the British Veterans will be chief marshal, and on his staff will be 100 officers representing many of the large military organizations in the United States and Canada. Among the military organizations to be represented are the Salem Cavalry, the Garrison of Halifax and the Woburn bands and a contingent of 10 pipers from the Highland Dress Association. The route of march has not been fixed, but the objective point is Trinity Church, where a sermon will be preached by Dr. Donald. After the services the parade will reform and march to the Association house. The parade will be a reception under the auspices of the British Veterans. In the evening the visitors will be taken to the Hotel de Ville, where a dinner will be given by the British Veterans. The ceremony was performed by Rev. Jas. Hardy.
George Eckstein, referee in the suit for divorce brought by Dr. Charles O. Tupper, formerly of Cumberland Co., N. S., against Estelle J. E. Tupper, has submitted his finding to the county clerk of Brooklyn. Referee Eckstein recommends that the petition of Dr. Tupper be granted. Mrs. Tupper belongs to a well known family of Yarmouth, N. S., and the respondent, Irving Lovitt, also hails from that town. Mrs. Tupper has lived in Yarmouth since her husband went to Brooklyn. Mrs. Tupper declined to defend the suit.
Among recent deaths of former provincialists were the following: In Dorchester, Aug. 13, Mrs. M. J. Regan, wife of J. Regan, formerly Miss McKenney of St. John, aged 43 years; in Nepesee, Dorchester, Aug. 13, Daniel Shea, formerly of St. John; in Dorchester, Aug. 16, Mrs. Christina A. Campbell, wife of Hugh Campbell, late of Prince Edward Island; in Dorchester, Aug. 16, Miss Edith Trainor, aged 48 years, formerly of Prince Edward Island; in Exeter, Aug. 12, Hector MacDougall, aged 78 years, formerly of Cape Breton.
The death occurred in Clinton recently of Mrs. Ann McAllister, aged 77 years. She was born in Ireland, but settled in St. John in 1858. She came to Clinton a few years ago to live with her daughter, Mrs. Jos. E. Kinneer. Mrs. McAllister had ten children, only two of whom are alive. Mrs. Kinneer and Mrs. Mary Kellogg of St. Paul, Minn. She left a sister, Mrs. Mary E. Chambers of New Brunswick.
Regarding the Canadian political situation, the Boston Evening Transcript says: "Is Sir Wilfrid Laurier big enough to survive the defection of all his cabinet? This is the question which Canadians will begin to ask one of these days if the present rout continues. The loss of two cabinet ministers in a few months would naturally be a heavy blow to any administration. Even when such a retirement is accompanied by no stinging, the event

PATENTS PROMPTLY SECURED.

St. MARTIN'S. The Presbyterian Sunday school held its annual picnic on Tuesday at the Corner. A most enjoyable time was spent. A large number were in attendance. Games of popular kinds, including foot races, sack races, etc., were indulged in.

A TAME ROBIN.

Mr. Robertson, station master at Torryburn, has succeeded in taming a robin to such a degree that the bird cannot now be persuaded to leave home. The robin was caught almost a year ago by a boy named Sutherland, who gave it to Mr. Robertson. The latter has been very successful in taming the robin as a cage pet, and now the robin is as much of a household pet as a canary. Even more in fact, for the cage is left open every day and the robin makes itself quite at home around the station house. It flies to nearby trees and buildings, but always comes back and pecks at the door of Mr. Robertson's house until entrance is given.

Weak Heart, Sudden Death.

MANY FALLING BY THE WAY BECAUSE OF THIN BLOOD AND WEAK HEART ACTION.
Sarcotex is a newspaper but contains the report of some sudden death resulting from heart trouble. With the blood in proper condition the heart repairs its own waste and throws up on Friday and year after year. By enriching and purifying the blood Dr. Chase's Nerve Food prevents and cures palpitation of the heart, irregular beating, weak heart action and all similar derangements. It ensures healthful and vigorous action of all the vital organs. Note your increase in weight while using it. The portrait and signature of Dr. A. W. Chase are on every box.

TRAITS OF PIUS X.

Pope Pius X. is a moderate smoker. He is a priest, even of the humble ranks, do not condescend clerical decorum to smoke in public; and Cardinal Sarco has always observed this rule, but in private he enjoys a good cigar.
Like Pius IX., the new Pope is musically inclined. Pius IX. was a proficient player on the piano and organ and sang the mass in a rich baritone voice. Pius X. has similar accomplishments.

FATAL ERROR.

(Philadelphia Press.)
Tess—So their engagement is broken off.
Jess—Yes, they quarrelled, and she was in the wrong.
Tess—And she wouldn't admit it?
Jess—No, she was the whole trouble. She did admit it, and after that she simply became unbearable.

To Cure a Cold in One Day Cures Croup in Two Days. Take Laxative Bromo Quinine Tablets. *E. W. Johnson* on every box. 25c. Seven Million boxes sold in past 12 months. This signature, *E. W. Johnson*

"A horseshoe is supposed to be a sign of good luck." And so it usually is, if it goes under the wire first on your horse.—Philadelphia Press.
