

E. L. Lindsay
Ladies

To Our Patrons.

This was the first College chartered in the Province for the education of young ladies. It has drawn its pupils from every part of the Dominion, and many from the United States. Over 2000 young ladies have been registered as pupils, and over 190 have completed the course of study and graduated. Its graduates are in demand as teachers, many of them filling honorable as well as lucrative positions. The class just graduated numbered ten, and the next class will be still larger. The College is in a very prosperous condition, and is preparing for even greater success in the future.

Every department is thoroughly equipped, both with competent professors and teachers, and all modern appliances. Ladies wishing to proceed to graduation, will find large classes to enter. Those wishing to take a special course can make such selections as they may desire. The music department has prepared more teachers than any other College in the Dominion. It is still in charge of Prof. Ambrose, assisted by Profs. Parker and Newman, and three lady teachers. The Art department is in charge of Prof. Martin, assisted by at least two other art teachers, and is affiliated with the Government School of Art and Design, thus having the same studies and the same examinations and prizes. Our Building is by far the most commodious College building in the country. It has over 150 rooms and was erected at a cost of \$110,000. Its Dining Hall and Parlors are of magnificent proportions. Its rooms very different from those usually found in Colleges. Its halls very wide, ceilings very high, class rooms capacious, hot and cold water on every flat, hot and cold baths always accessible. The institution has all needed play grounds, and the pupils take exercise in the open air daily.

Our charges are very low considering the location and character of the College. Our bills run from \$160 to \$250 per annum or \$40 to \$62.50 per term, only those taking both music and art reaching the higher figure. Fifty dollars is an average bill. This is payable quarterly in advance. The health of our pupils has always been remarkably good, our building is so roomy, and so well ventilated that we are never troubled with an offensive atmosphere. The most recent improvements in plumbing, suggested by Sanatory Science, have been introduced. Physicians whose daughters have attended here, have without exception congratulated us on the excellence of our arrangements for health and comfort.
