THE TORONTO WORLD: WEDNESDAY MORNING, JUNE 9, 1886.

In these suspicious times it is not enough that manufacturers of food preparations base their claims for patronage on the simple statement that their goods are "absolutely pure." The absolute purity of a poison intensifies the baneful effects of its improper use. The absolute purity of ammonia, a drug often used in the manufacture of baking powder and in some of the powders most largely advertised, greatly increases the force of the objection made by the most eminent scientists of our day to the use of ammonia in food. This protest of the medical and chemical professions is due to the fact that ammonia-a product of decompositionwhen taken into the stomach with our daily meals is exceedingly injurious.

Hence the public should insist upon knowing what all food compounds contain and ALL that they contain. Let the edict go forth that no article intended for use in the preparation of our daily bread shall receive public support unless the manufacturers' formula be published. Then shall we have less imposition practiced upon a confiding public, and as a result less injury to the public health.

The rioters reasembled with increased strength and again attacked Duffy's, this time overpowering the police and driving them from the place. In the first as-sault Chief of Police Carr was wounded. He was carried away, and now lies in a critical condition. When the Orangemen returned to the fight they were accompanied by a large number of factory girls who goaded or shamed the men on to battle and formed a most dangerous element. When the officers abandoned Duffy's, the mob took complete possession of the tavern. It was thoroughly angked All the taps and spiggots were set running and everybody was invited to help himself according to his taste. All the barrels of liquor found in stock were carried into the street, lifted up high and let fall until they broke and liberated their contents. All the furniture was carried out, piled in the centre of the roadway and burtsed, to furnish the rioters with light dur-ing the earlier stages of the orgie than the mind. The noise, profanity and disorder were terrible. The mob ended their work here by firing the tavern itself, and it burned to the memor ing the tavern itself, and it burned to the ring the tavern itsen, and it builded to be round. Then the stronger men, who had be ome infuriated and not overpowered by their otations, ran through the streets wrecking and pillaging wherever they went and increas-ing their following the further they proceeded.

The police hastened thither in advance of them and attempted to protect the property, but they were over-powered and driven away. The mob left in possession treated the tavern as they had treated Duffy's, turned on all the taps, broke the full barrels in the street, made a bonfire of the furniture and finally set fire to the building. The police returned, and this time got the better for a time of the mob, whose ranks were depleted by the scores who had fallen away in the dark-mess, and extinguished the flames before they could gain control of the structure.
