

It was provided that the cost of the works would be borne by the Hydro-Electric Power Commission of Ontario on the Canadian side and by the Niagara Falls Power Company on the United States side.

A copy of the Convention is attached as.....Appendix III. The general location of existing power stations on the Niagara river is shown on the attached.....Plate 4; the location of the proposed remedial works at the Falls is shown on the attached.....Plate 5; and the location of the proposed remedial works is shown superimposed on the aerial photograph attached as.....Plate 6.

(4) The Ogoki-Long Lake Diversion Project

The Ogoki-Long Lake Diversion Project has been the subject of exchanges of correspondence between Ontario and the Dominion since 1925. The waters of the Ogoki and Long Lake watersheds naturally flow into the Albany river and thence into James Bay. Ontario at various times has had under consideration the project of diverting these waters into Lake Superior and the Dominion has agreed that any waters so diverted should, in any negotiations with the United States, be considered as Canadian waters throughout the Great Lakes and St. Lawrence system. Accordingly when the St. Lawrence Deep Waterway Treaty was negotiated Canada arranged for the incorporation therein of a provision vesting in each country the exclusive rights to the use of waters equivalent in quantity to any diverted from watersheds located in that country and definitely providing that such water should be available to that country for power below the point of diversion so long as it constituted a part
