DOCTORS AT SEA.

GEORGE McDONALD, Clerk.

Nature has just one pigment on her palette with which she produces all the marvellous tints of beauty, and that one pigment is the blood. The shell-like pink beneath the finger nails, the delicate rose of the cheek, the cherry brilliancy of the lips, the iridescent brilliancy of the eyes are all produced by the blood. Just as the permanence of a beautiful painting will depend upon the purity of the colors with which it is painted, so the permanence of beauty depends on the purity of the blood. Paint, powder and cosmetics won't avail to preserve beauty. Beauty begins in the blood. Dr. Pierce's Golden Medical Discovery is a true beautifier, because it provides for nature that pure blood with which alone she can paint. The use of this medicine will cleanse the skin, heighten the complexion, brighten the eyes, and give to face and form that radiant health which is the greatest charm of beauty. Dr. Pierce's Pleasant Pellets are very effective in ridding the system of clogging residuum, which accumulates with constipated habit.

What the dew is to the flower gentle words are to the soul.

A LIVING BAROMETER.

The Crablike Spider That Poses as Yucatan's Weather Sharp.

In Yucatan, a land of many curiosities, there is a living barometer in the form of a small spider, called "am" on account of the effect produced by its poison. As far as its own conduct goes, the insect is inoffensive and can be handled with impunity, but if anybody has the misfortune to get one mysteriously mixed with his food he is certain to die after a few hours and meanwhile for some unexplained reason will frequently ejaculate "Am, am, am" hence the name of the spider. Throughout the peninsula this is affirmed to be a fact, and if an am falls into fodder of horses or mules the animal that swallows it surely dies.

This spider is shaped like a crab, minus the claws, and is of a bright yellow color, with brown spots; the biggest could be accommodated upon a silver dime. Its favorite abode is among the leaves of the banana shrub, commonly, but erroneously, called tree web, which is prodigiously large, considering the size of its architect, and proceeds to devour the flies that are unlucky enough to get entangled in the meshes of this astonishing little glutton, that is not satisfied with less than a dozen a day—that is to say, it consumes a good deal more than its own bulk. Its progeny is numerous and appears at first like more black specks, smaller than the smallest pin's head.

The sky may be blue and cloudless when suddenly the am commences taking in its sails, or, rather, gathering in its net, with neatness and dispatch, cramming the whole of the material into its diminutive body entirely out of sight. A few minutes completes the job, and the spider takes up its position on the under surface of one of the great leaves to be lulled by the gentle swaying and sheltered while the storm rages. It is for this that the am has prepared, and never is it mistaken. When the web is taken in, rain will certainly fall within an hour.

The moment the am is touched it feels death and lets itself drop, showing no sign of life until again placed upon a leaf or on the ground. Many a one has lain in the palm of the writer's hand inert, all its legs drawn close to its body, while it was examined at leisure, even being picked up in the fingers without its manifesting any life.

BEAUTY SPOTS.

Try lemon juice for whitening the neck. Apply it with a linen cloth. After the head has been shampooed, whenever possible, give the head a sun bath.

A writer states that oily hands may be made comfortable and touchable by wetting them once or twice a day while clean with cologne, alcohol or toilet vinegar.

A good circulation is essential to the growth of the hair as well as to its color and fineness. A frequent, vigorous brushing with a stiff brush is the best method of obtaining this.

A writer upon the complexion says the best way to treat freckles, a sure cure in all but very obstinate cases, is to touch them night and morning with a camel's hair brush after dipping it in lemon juice.

For a greasy skin nothing is better than the combination of an ounce of dried rose leaves, half a pint of white wine vinegar and half a pint of rosewater. Let the vinegar stand on the rose leaves for a week, then add the rosewater. Use afterwards in a cup of distilled water.

A Geological Fallacy.

Probably the most wild and unjustifiable of all the crude beliefs respecting geological resources is that which holds to the conviction that by going deep enough the drill is sure to find something of value, no matter at what point the work of boring is commenced. There are numerous wise persons in every community, estimable, influential and in the highest degree public spirited who are convinced that the question, for example, of finding coal in their special locality is simply a matter of the depth to which the explorations are carried. Rock oil and natural gas are recognized as desirable products in every progressive community, and every such community contains persons in other respects intelligent who are ready to stake their own fortune and that of their nearest friends on the belief that oil and gas are everywhere underneath the surface and that their sources can be tapped with the drill provided only there is sufficient capital to keep up the process of drilling long enough.

Professional Shoppers.

Professional shoppers are employed by a certain large firm of London drapers to test the abilities of shop assistants. This firm owns over thirty large shops and employs nearly 1,000 assistants. To find out whether every customer is politely served a number of lady customers are employed to call at the various shops. They are told to give as much trouble as possible and sometimes to leave without making a purchase after looking at nearly everything in the shop. Should the unfortunate assistant's temper not be equal to the strain, or should a single word be said that might offend, a report will infallibly reach headquarters and lead to the dismissal of the sorely tried handler of silks and ribbons.

An Example.

"After all, it isn't the big troubles that bother a fellow so much; it's the little things that annoy you most."

"That's right. Why, they say a horse's sting is only one-thirty-second of an inch long."

Speakers Sore Throat

Public speakers and singers know how useless and sickening are cough mixtures, sprays, lozenges, etc., for irritable sore throat, and state that the most satisfactory remedy is Catarrhose, the advantage of which is that it acts quickly and is convenient to use in public places. Catarrhose relieves congestion, allays inflammation, and is a protection to the membrane. As a safe guard against colds and Catarrh it has no equal. Rev Dr. McKay, Goderich, says,—"Catarrhose is an excellent remedy for throat irritation arising from throat irritation." Physicians, ministers and singers recommend Catarrhose; druggists sell it for \$1. Small size 25c. By mail from Polson & Co., Kingston & Co., Kingston, Ont.

Dear Sirs.—A few days ago I was taken with a severe pain and contraction of the cords of my leg, and was unable to put my foot to the floor. A friend told me of your MINARD'S LINIMENT, and one hour from the first application I was able to walk, and the pain entirely disappeared. You can use my name as freely as you like, as I consider it the best remedy I have ever used.

The True Tragedy of Life

is ill-health, disappointed ambitions, usefulness destroyed, pathetic miseries, tragic, poor blood, weak nerves, a tired brain. Is there hope? Yes! Because there is a cure.

Ferrozone Tablets make blood; not blue blood, but the fluid that strengthens the whole body. Ferrozone does this quickly by improving digestion, stimulating assimilation and by imparting health and tone to the whole system. Messrs. McGill & Co., druggists, will tell you a great deal more about Ferrozone. Ask them to tell you of the wonderful curative properties of Ferrozone Tablets.
