

THE FAMOUS EASY-RUNNING Monarch Lightning Sawing Machine

IT BEATS THE WORLD FOR SAWING LOGS
OR FAMILY STOVE WOOD.

SENT ON 30 DAYS' TEST TRIAL.

The boy in the picture on the left is sawing up logs into 20-inch lengths, to be split into stove-wood for family use. This is much the **BEST** and **CHEAPEST** way to get out your firewood, because the 20-inch blocks are **VERY EASILY** split up, a good deal easier and quicker than the old-fashioned way of cutting the logs into 4-foot lengths, splitting it into cordwood, and from that sawing it up with a buck saw into stove-wood. We sell a large number of machines to farmers and others for just this purpose. A great many persons who had formerly burned coal have stopped that useless expense since getting our Machine. Most families have one or two boys, 16 years of age and up, who can employ their spare time in sawing up wood just as well as not. The

MONARCH LIGHTNING SAWING MACHINE

will save your paying money and board to one hired man and perhaps two men.

The boy at the right in the picture is sawing up cordwood in a buck frame. You can very easily use our machine in this way if you have cordwood on hand that you wish to saw up into suitable lengths for firewood.

A boy sixteen years old can work the machine all day and not get any more tired than he would raking hay. The machine runs **very easily**, so easily, in fact, that after giving the crank half a dozen turns, the operator may let go and the machine will run itself for **three or four revolutions**. Farmers owning standing timber cannot fail to see the many advantages of this great **labor-saving and money-saving machine**. If you prefer, you can easily go directly into the woods and easily saw the logs into 20-inch lengths for your family use, or you can saw them into 4-foot lengths, to be split into cordwood, when it can be readily hauled off to the village market. Many farmers are making a good deal of money with this Machine in employing the dull months of the year in selling cordwood.

It makes a great difference in labor and money both in using our machine, because you get away with a second man. It takes two men to run the old-fashioned cross-cut saw, and it makes two backs ache every day they use it. Not so with our saw.

We offer **\$1,000** for a sawing machine that is **EASIER OPERATED** and **FASTER RUNNING** than ours. Every farmer should own our machine. It will pay for itself in one season. Easily operated by a sixteen-year-old boy.

N. B.—We are selling **SIX TIMES** as many Machines as any other firm, simply because our Machine gives perfect satisfaction. Our factory is running day and night to fill orders. Send in your order at once. The **BEST** is the **CHEAPEST**. Our agent sold four machines in one day. Another sold twenty-eight in his township. Another agent cleared **\$100** in one week. **BE SURE AND MENTION THIS PAPER.**

WE WISH A LIVE, WIDE-AWAKE AGENT IN EVERY COUNTY IN THE UNITED STATES AND CANADA. Write for Latest Illustrated Catalogue giving Special Terms and scores of Testimonials.

One Illinois stock-raiser, who gives about one-third oil-cake to two-thirds corn, with rough feed sufficient, tells the **Prairie Farmer** that with this ration his beef cattle fatten one-third faster than with corn alone. Another says his animals never took on flesh so rapidly as since he began the use of oil-cake.

Professor E. M.
