

THE ACADIAN WOLFVILLE, N. S., APRIL 15, 1892. Easter.

Since the first century after the death of Christ Easter has been celebrated in the Christian church, though, like other festivals, the day set apart for its commemoration varied, and was the source of much discussion among the early Christians. After many centuries a union of sentiments was established and the present computation agreed upon. Whatever time in the year the good, wise men of old had decided upon for the keeping of this sacred feast could have made the day no less dear to us, for the memory of what the day recalled would make it sacred any time of the year. As the word Easter signifies joy, the early days of spring seem especially suited for its commemoration, for the soul is then touched by the awakening treasures of the earth and unfolds itself to the beauties of this world, and can claim a nearer relationship to its Creator. Easter is essentially the festival of the soul, entirely apart from anything worldly or earthly. Christ-mas the heart and soul rejoice together, the heart overflowing with human love, while the soul leads itself to sanctify this earthly joy—Christmas bells ring out wildly, rapturously, and make the heart throb with its love and good will toward men, but the bells of Easter ring majestically, triumphantly, telling of the soul set free. To these whose best-loved treasures have been taken away, Easter should bring hope and faith. There are times when doubt almost triumphs over belief, and when faith is taken from us life loses the one element that makes this worldly existence bearable. Christ's life was lived to show us the true way, and His sufferings and final resurrection were for the purpose of comforting those whose lives are passed in the valley of shadows. There should be no questionings, no scepticism about the future existence, for far above the noise and tumult of the present life His voice is heard giving us that precious promise which should be a heart-ease to every soul: "I am the Resurrection and the Life; he that believeth in Me, though he were dead, yet shall he live; and whosoever liveth and believeth in Me shall never die."

A Good Suggestion.

In the April number of the Acadia Athenaeum appears an excellent article on "The Canadian University as a Factor in the Development of a Canadian Nationality." The writer is Mr. C. H. McInyre, of the Class of '89, who is now a student at the Harvard Law School. The whole article is a strong plea for the cultivation of a true Canadian sentiment in our land, and especially deals with the work that can be done in this direction by Canadian Universities. With this end in view he recommends that more attention be paid to a scientific study in Canadian history and Canadian political economy, and a fuller discussion of Canadian concerns in connection with college debates, &c. He also advocates the organization of National clubs, whose doors shall be open to men of every party and people, before which addresses shall be given by public men qualified to discuss the politics, resources, and social, religious and educational condition of our Dominion. We heartily endorse the sentiment expressed, and trust that the movement thus inaugurated may be taken hold of by others, with the effect of producing and fostering a patriotic interest in this Canada of ours on the part of the young men who claim her as their home.

Nova Scotia Institute of Science.

The regular monthly meeting of the Institute of Science was held last evening, Robert L. Litton, of Australia, and Rev. A. C. Waghorne, of Newfoundland, were nominated as members. Dr. MacGregor read an important paper on "A graphic method of treating the inertia of the connecting rod." Mr. Piers followed with a paper on the identification of the winter wren. He is the fortunate possessor of the only nest of these species known to have been found in the province. Supervisor McKay read a very interesting paper by the Rev. Dr. Maury, "On the formation of artificial granite." The superintendent of education read Mr. Annis' paper on the solarium fossils of Arisiel. Also a paper by the Rev. Mr. Waghorne on the flora of Newfoundland and adjacent lands. These various papers were discussed by the president, the superintendent of education, Commissioner Symons and Secretary Wilson. He. Herald of Tuesday.

Personals.

Miss Edna Gilmore left for Boston on Saturday last week. Mr. George Bishop returned from the Upper Provinces, where he has been in the agency business, on Monday. Mr. Carl Shaw, who has for the past few months been employed on the S. S. Danara, of the Pickford & Black line, left for Winnipeg on Monday. Mr. T. B. Wallace, who has been working at his trade in Parisboro during the winter, arrived home on Tuesday.

Mrs Hunt's Lecture.

A large and very appreciative audience assembled in College Hall on Monday evening to welcome Mrs. Mary H. Hunt, of Boston, superintendent of the Scientific Instruction department of the W. C. T. U., who lectured under the auspices of the Wolfville branch of the society. Mrs. W. H. Young, president of the W. C. T. U., presided and introduced the speaker. Mrs. Hunt is a woman of commanding presence, and her face, figure and manner are indicative of quiet strength. Her voice, though not especially musical, is strong and full, and was never raised above a pitch easily controlled by the speaker. Neither in voice or manner was there anything extravagant or unwomanly. She handled her subject with dignity and force, and held the fullest attention of her hearers throughout. The address was in advocacy of the introduction by legislation of scientific temperance instruction in the schools. In order to secure the triumph of the great temperance reform there must be education of the public intelligence in regard to the nature of alcohol and its effects upon the human system. There must be a prevailing public conscience against the products of the brewery and the saloon, otherwise repressive and prohibitory legislation will in a great measure fail of its desired results. The time to inform the mind and educate the conscience in reference to the use of alcohol is in childhood and youth, before wrong habits of thought and conduct have been formed. Hence the demand for scientific temperance instruction in the schools. To this department of the temperance reform movement Mrs. Hunt has, for the past ten years, especially devoted her energies, and the result she holds to be most gratifying and encouraging. The reform has made head-way against what was regarded by many as insuperable difficulties, until now in all the territories of the United States, and in all the states but nine, legislation has been secured, making instruction in temperance compulsory. Mrs. Hunt came to the Maritime Provinces on the invitation of the Maritime W. C. T. U., for the purpose of securing the legislation necessary to introduce compulsory temperance instruction, so as to place us on a footing with other countries in this direction. At the close of the lecture a standing vote was taken to ascertain the feeling of the meeting regarding the act then before our Government at Halifax, with the result that the audience was unanimous in their support, and Professors Tufts and Higgins were appointed a committee to convey the decision to Parliament. The audience expected a treat, and they were not disappointed. The thanks of the community are due the ladies for their enterprise in securing such an able lecture for us.

Real Estate Changes.

Following are a few of the changes in real estate that have been made during the past week or two:— Capt. G. H. Gilmore has purchased from J. S. Dodd the property on which he resides extending to the south as far as the road which divides the property; price \$2,000. C. M. Vaughn has purchased from J. S. D. the property commonly known as "Blenkbony" orchard extending south from the road which divides the property to the extremity of the Pick lane; price \$4,000. The property formerly occupied by the late Mrs. Jane Heales has been sold to Robt. Edwards, of Halifax; price \$1,000. T. A. Munro has purchased from L. E. Duncanson the lot adjoining the store of F. J. Porter; price \$650. L. E. Duncanson has purchased from T. A. Munro the property used by Mr. Munro as a tailoring establishment; price \$1,000. Rev. A. Caboon, of Helbron, Yarmouth county, purchased from Mrs. Kempton, a lot on Keene street, price \$150. D. E. Woodman purchased from L. E. Duncanson a lot in the south side of Keene street; price \$100.

A Land Without Prisons.

Iceland is a model country, there being neither prisons, soldiers, drunkenness nor police. Colonized in 874, it soon after became independent, and its isolated position from the beaten track of ocean commerce, has preserved its population from many of the vices which are most inseparable from a high state of commercial prosperity and extensive intercourse with the rest of mankind. The Icelanders are a hospitable, genial people in spite of the hardships of their life and though they live on a volcanic island within the Arctic zone and their existence is a continual struggle for bread, they preserve so much kindness of disposition as to commend themselves to the respect and admiration of even the most casual visitor.

Census Bulletin No. 6, dealing with the habitation of the people of the Dominion, has just been issued. It shows that the total number of houses in Canada is 930,684, of which 910,879 are built of wood, stone and brick. The remainder includes 10,555 shanties and 250 houses, the latter being found exclusively in the North-west territories. There are 854,842 inhabited houses, 54,164 empty, and 10,873 in course of construction. The number of dwellings in Nova Scotia in 1881 was 73,776, and in 1891 it was 78,413 being an increase of 4,677 during the decade. The ratio of uninhabited houses to the inhabited was exactly five eighths of one per cent. in 1881, and curiously enough the same ratio was found to exist in 1891. Of the 854,842 inhabited houses in the Dominion, 81 1/2 per cent. are built of wood, 15 1/2 per cent. of brick, and 3 per cent. of stone.

Seven Years Without a Birthday.

A Scottish clergyman who died nearly thirty years ago, Mr. Leishman of Kinross, used to tell that he had once been seven years without a birthday. The statement puzzled most who heard it. They could see that, if he had been born on the 29th of February, he would have no birthday except in a leap year. But leap years come once in four years, and this accounts for a gap of three years only; their first thought would therefore naturally be that the old man, who in fact was fond of a harmless jest, was somehow joking about the seven. There was, however, no joke or trick in his assertion. At the present time there can be very few, if there are any, who have this tale to tell of themselves, for one who can tell it must have been born on the 29th of February at least ninety-six years ago. But a similar line of missing dates is now a common return; and indeed there are no doubt some readers of this page who will have only one birthday to celebrate for nearly twelve years to come.

The Lumber Cut.

The lumber cut on the upper St. John and the Annapolis will be about the same this year as last. It was feared early in the winter that the cut would be very light, but the weather of late has been so favorable that the operators have been enabled to do much more work than they hoped to do. The total output will be in the vicinity of one hundred and twenty millions. A Sun reporter had a talk with a big operator yesterday and learned the following facts concerning the cut on the St. John; Robert Connors has got out 6,000,000, W. H. Cunliffe 6,000,000, Kilburn & McIntosh 5,000,000, and Gilman Bros. 4,000,000 for W. H. Murry; Mr. Noble has cut 3,000,000, W. Stevens 2,000,000 and Mr. Duchane 2,000,000 for A. Cushing & Co.; Mr. Dickey has got out 2,500,000 and Mr. Chisholm 2,000,000 for Stetson, Cutler & Co.; Neil McLean has cut 3,000,000, Mr. Boyd 3,000,000 and B. W. Mallett & Co. 8,000,000 for Miller & Woodman; Mr. Clark has 2,000,000 for Geo. Barnhill; Mr. Sweeny has 4,000,000 for S. T. King & Sons; J. A. Morrison of Fredericton has some 5,000,000 for himself; Liarth Nixon has about 4,000,000 for J. R. Warner & Co. This of course does not take in anything but the cut of the large operators. Some 40,000,000 has been cut out of the Annapolis.—St. John Sun.

Meeting of Presbytery.

The Presbytery of Halifax met in Windsor on Tuesday last. Present Rev. Messrs Simpson, Murray, Begg, Coffin, Thompson, Thorne, Dawson, Rogers, and elders Blanchard and Smith. A goodly number of others interested in the proceedings were present. Leave was granted Annapolis and Bridgetown to moderate in a call. The location of catechists within the bounds of Presbytery was left in the hands of the clerk and convenor of Home Mission committee. After considerable routine business was transacted, the call from Newport to Mr. Dawson, of Canada, was taken up. Messrs Smith and Farquhar urged the claims of Newport. The call was unopposed by Mr. Dawson. The congregation was practically a unit in the matter, and confidently hoped that the good work initiated by Rev. J. W. McLennan would be carried forward if Mr. Dawson would accept. Canada was represented by Messrs Dickie, Burgess and Stairs, who showed how faithfully and successfully their pastor had laboured. They strongly expressed the desire of the people that the tie should not be severed. After several members of the court had spoken Mr. Dawson was called upon to state his decision. To the regret of all present the reverend gentleman stated that his health had become so much impaired he was unfit for active work, and hence must decline the urgent call. Leave was asked and granted to Messrs Dawson and Ross, of Wolfville, for three months absence. They will spend the fortnight in Britain. Much sympathy is felt for Newport in the disappointment. Presbytery will meet in Halifax on the 25th inst.—Windsor Tribune.

\$500 Reward.

For a case of Dyspepsia or Indigestion that cannot be cured by Nature's great remedies—St. Lawrence Dyspepsia Powders and St. Lawrence Bitters. The Powders act directly upon the diseased and overtaxed stomach, neutralize its acidity, soothe the irritation, ally the inflammation, and lining membrane and help to digest the food. St. Lawrence Bitters, the most perfect remedy found in Nature for purifying the blood, cleanses the system, makes blood pure and strong and gives vigor and lasting vitality to the diseased stomach as well as to every other organ of the body. The good effects of the bitters are felt almost immediately in relieving distress after eating, heartburn, headache, and other painful symptoms of this wretched disease. The poor sufferer is raised out of his dependency and irritability into a cheerful frame of mind. The bitters strike deeper, gets at the very root of the disease, by its action upon the blood and slowly but surely drives it from the system making a complete cure. For sale by Geo. V. Rand, Drugist, Wolfville.

Rev. J. Clark, Coburg, Ont.—"From my actual knowledge I have pleasure in testifying that K. D. C. is the best remedy for Dyspepsia that has come to my notice."
