

Re-Elect
ROSE

Alderman
1920

To the Electors of St. Catharines:

In offering my name for re-election as Alderman for 1920 I do so with a sincere desire to serve you in a faithful and conscientious manner, with the benefit of close study of Municipal problems gained as a member of the Council during the year now closing.

As a member of the Finance Committee I have been in a position to consider it a duty to obtain a thorough and business-like insight into the various situations which have arisen, and particularly those which will confront the Council next year, and I feel that the knowledge I have acquired warrants me in asking for general endorsement by the electors to serve as one of their representatives for another year.

I have endeavored in every way to promote the successful development of the city for the welfare of all, and trust that my work has met with your approval.

From selfish motives I would be inclined to shrink from the arduous work ahead of next year's Council, but the very problems to be faced require more than usually that some of the present Aldermen should be returned to office, and I feel it a duty as a citizen with the welfare of the city at heart that I should freely offer myself for re-election, and if I am honored with your successful support I promise to give undivided and independent attention to the duties of the office in a business-like and thorough manner throughout the year.

Faithfully yours,

HOWARD E. ROSE

To The Electors of St. Catharines

In offering my services again as an Alderman of the City I hope for the honor of your support, and sincerely trust to prove myself worthy of your continued confidence.

I stand for immediate railroad development and acceptance of the Dominion Government's proposition, if not already forfeited, but with our interests as regards franchises, etc., safely guarded and protected, and, eventually, absorption of the N. S. & T. by the Hydro Radial system.

We can then make no mistake. The city cannot financially afford to stand still for years whilst Hamilton and Windsor, etc., are forging ahead.

I accept full responsibility for the Cemetery deal, which directly or indirectly is worth \$50,000 to the city. Also, for the New Sports Grounds, which will help to make St. Catharines a great sporting centre.

I also stand for the beautification of the city, as evidenced in the Civic Rose Garden, which has cost the city practically nothing.

Yours faithfully,

C. H. NASH

For Biliousness

Biliousness is a common form of indigestion. It is brought on by food-waste which the stomach, intestines and bowels fail to expel. If you will take a few doses of Beecham's Pills, when bilious, you will soon rid yourself of the impurities, relieve sick headache, stimulate the liver and bile and tone the stomach. Healthy conditions are quickly re-established by using

BEECHAM'S PILLS

Directions of Special Value to Women are with Every Box. Prepared only by Thomas Beecham, St. Helens, Lancashire, England. Sold everywhere in Canada and U.S.A. In boxes, 25 cents.

THE CANADIAN BANK OF COMMERCE

BIG LOSS IN GRANARIES

Bad Weather and Mice Destroy Much Grain.

Concrete Structures Best — How to Make Old Granary Efficient — Flush Ewes to Increase 1919 Lamb Crop — Great Shortage of Fall Wheat Seed.

(Contributed by Ontario Department of Agriculture, Toronto.)

NO hard and fast rules can be laid down for the erection of a convenient and efficient granary. Each problem requires a knowledge of local conditions and requirements. Granaries, in the majority of cases, are built in enclosures on the barn floor, and constructed with no little regard for strength, durability and convenience. These structures should be located immediately over the feed room, each bin having a chute with a controlling slide, or a canvas distributor to convey the grain to the hopper of the grinder; or if the grain is intended for market, to a sack placed on the scales below the chute ready to receive it. To facilitate emptying the grain, the floor of the bins should be sloping.

The important consideration in the construction of granaries and bins for loose grain is to be sure that the structure is designed with sufficient strength to prevent bulging of the sides and springing of the floor, for grain, owing to its enormous outward thrust, corresponding to what to that of water, has a tendency to burst the sides unless well braced or supported. Timber construction requires frequent repairs to prevent decay and general depreciation from use. It is always liable to crack and shrink in the summer when the bins may be empty, and when the new grain is dumped into the bins an enormous quantity promptly disappears into the cracks and crevices and through mice holes, entailing considerable loss to the farmer, to the consumer and to the nation. Thousands of bushels of grain are, in this way, annually lost to the producers through sheer indifference to the condition of the granary. Yet this preventable waste may be easily remedied and made secure by lining the bins with sheet metal.

The watchword is "Conservation." Every grain is needed to feed the Empire and its Allies. It is therefore, highly desirable at this time to bend every effort to eliminate all possible leakages and conserve our grain for the need of the Allied nations. While there is an annual depreciation on a timber structure varying from 4 to 8%, concrete construction grows better as it grows old; hence concrete properly reinforced, is the ideal material for granaries, because it is both damp proof and rat-proof, two very essential factors in the construction of granaries.

Concrete properly made to suit existing conditions is absolutely impervious to moisture, and can be kept as dry as any structure of wood ever built. The experience of many farmers is that grain, massed together in a bin, will not spoil on contact with concrete, nor will corn mold, provided there is good ventilation and the roof is tight. To get rid of rats and mice destroy their nesting place and to this end concrete is pre-eminently the best material and is recommended for all farm structures.

Under average present day conditions a reinforced concrete granary may represent an additional outlay of about 25% over that required to construct of timber, but the high efficiency distinctive of concrete quickly offsets this increased initial cost. Concrete construction has many in short, important advantages. The contents are safe from the depredations of rodents, is damp-proof, requires neither paint nor repair, is fireproof, the grain is perfectly preserved under all conditions of climatic and temperature, and the resulting structure is practically everlasting. — Prof. John Evans, Ontario Agricultural College, Guelph.

Care of Ewes After Weaning.

In order to avoid udder trouble it is necessary to keep a close watch of the ewes for a few days after they are separated from the lambs. Not a few cases of defective udders can be traced to the want of a little care in this respect. Milk out just enough to keep the udder soft the day after the lambs have been weaned. After two days' time they are again milked out. Some ewes do not need any more attention after the second milking. Such ewes may be marked to indicate that they are dry. Three more days should elapse before the next milking is done and this method followed until it is certain the entire flock is safe. In conjunction with the method outlined above the ewes should be separated some distance from the lambs, and be on scant pastures until all are perfectly dry. This is a good time to go over the flock and cull out all undesirable members. Non-producers and those with broken mouths and poor udders should not be retained. A good deal of the success of the subsequent lamb crop will depend upon the treatment the ewes receive from time of weaning until after they are bred. They should have good pastures and be given an opportunity of putting on flesh. This is what is commonly called "fattening." Nothing is better for this purpose than rape pasture. It is usually from six weeks to two months from date of sowing that rape is ready for pasture. If rape pasture is not available new seeding or second crop of clover will serve fairly well. Stock should not be turned on rape or fresh clover for the first time when the leaves are wet from rain or even dew, in order to avoid trouble from bloat. — J. P. Sackville, B.S.A., Ontario Agricultural College, Guelph.

The Welland Avenue Sunday School held its Christmas entertainment last night.

CITY AND DISTRICT

We buy everything you want to sell, McGuire & Co.

A number of local hockey fans are going to Welland tonight to take in the Kitchener-Welland game.

Port Dalhousie Council, as one of its last acts, passed a by-law exempting houses occupied by returned soldiers from taxation.

The Deputy Returning Officers for the municipal elections are receiving their ballot boxes from Returning Officer Pay today.

Choice cut flowers, potted plants and floral designs, at all times, at Walker's Florist, 104 St. Paul Street. Phone 783. Jtf

Several social entertainments are planned for tonight chief of which is the New Year's Eve ball under the auspices of the Catharine Hamilton Chapter, I.O.D.E.

The Loney-Proctor fight has not been cancelled as reported and will be staged as advertised. A big block of tickets have already been bought up, so that the local fans should get their's at the earliest moment.

The funeral of Jeffrey, the infant son of Mr. and Mrs. Arnold Sadler took place yesterday from the parson's home, 82 Merritt street, to Victoria Lawn Cemetery. Rev. R. D. Hamilton officiating.

The many friends of Mr. George F. Peterson of this city will be pleased to learn that he came through the first round of the Midwinter Golf tournament with flying colors having beaten A. C. McMaster of Toronto yesterday by three up. Today he will be opposed by William G. Bibb of the famous Sleepy Hollow Club.

All that was mortal of the late Miss Molly Jackson who died on Sunday was tenderly laid to rest in the Mausoleum at Victoria Lawn Cemetery yesterday afternoon. Rev. Dr. Ratcliffe officiated, assisted by Rev. Dr. Clark. The bearers were G. Tinlin, F. C. McCordick, Wm. S. Wood, G. H. Fairfield, Arthur Yeoman and Walter G. Lloyd. Many beautiful flowers were sent in by friends.

Extradition of the former Emperor will be demanded from Holland as soon as the Treaty of Peace becomes effective.

CARPET CLEANING

NOW IS THE TIME TO HAVE your carpet cleaned. We do your work first-class by vacuum machines. Furniture crated and stored. Upholstering in all its branches. — CARPET CLEANING CO., 13 St. Paul Street. Phone 605. W. J. Westwood, Proprietor.

DON'T HAWK, BLOW, SNEEZE, OR COUGH USE "CATARRHOZONE"

When germs attack the lining of the nose, make you sneeze and gag—when later on they infect the bronchial tubes—how can you follow them with a cough syrup.

You don't do it that's all. Cough syrups go to the stomach—that's why they fail.

But Catarrhozone goes everywhere—gets right after the germs—kills them—heals the soreness—cures the inflammation—makes Catarrh disappear. Not difficult for Catarrhozone to cure, because it contains the essence of pine balsams and other antiseptics that simply mean death to catarrh. Large size costs \$1.00 and contains two month's treatment; smaller sizes 25c and 50c all drug-gists and storekeepers.

THE WEATHER

TORONTO Dec. 31.—The depression which was in New York state land while another depression which yesterday has now reached Newfoundland has travelled rapidly from British Columbia is centered in Missouri. With the exception of a few light snowfalls the weather in Canada has been fair and for the most part quite cold.

FORECASTS—Easterly winds and light snow falls, Thursday west winds and becoming colder.

In police court today Mrs. Ada Hutton was committed for trial on charges of writing threatening letters and forgery.

Wouldn't you sound words of praise for the Dentist who served you without pain?

Wouldn't you appreciate him if he served you with great skill and at prices of extreme modesty? For just these reasons WE are so warmly spoken of and honestly appreciated by thousands of people who have turned to this office for Dental treatments.

Every branch of Dental work in this office is in the hands of a trained Specialist. We have found that this specialized form of treatment insures best results and aids in the saving of time and money.

Whether it is a tiny cavity or a difficult and extracting operation of bridgework that must be given attention you will find that our treatments are free from pain and equally free from excessive cost.

Fillings 50c. and up.

Crown and Bridgework \$3.00 a tooth.

Excellent Plates \$8.00.
