I'KENZIE SAYS THE JOB AGAIN

Halifax Citizen Declares Tan-lac Entirely Overcome Stub-born Stomach Trouble And Helped Him Make Big Gain

Hohard Mckenzie, 52 Longalu Healifax, N.S.

"My trouble started with indigestion. My food would turn sour in my stomach and hurt me so I had to go on a milk diet. I would bloat up with gas terribly and seemed to have inflammation of the stomach for I had an awful burning sensation just below my breast bone. I also suffered from a dull pain across my back that hurt me so at night that many times I had to get up and pace the floor. I fell off to one hundred and thirty-two pounds and got so weak I had to lay off from work eight months.

"But the way Taniac pulled me around was amazing. I soon had a good appetite and haven't had a bit of indigestion or pains since. I now weigh one hundred and ninety and am on the job every day. I'll be glad t otell everybody what a fine medicine Tanlac is."

Tanlac is sold by all good drug-

Splendid Tern Model.

NGENIOUS PIECE OF MARINE

A three foot model of a tern schooner complete even to the minutest details, is now at the Agriculture and Mines office, where its workmanship is being favorably commented on by many who visit the place. The model is the work of Chas. Butt. the 17 year old son of Mr. John Butt of Freshwater, Bay de Verde. It is made from a block of hard pine, copper bottomed, full rigged, and has a complete code of signals. In the making of the variation is sheer waste of time and money, "whatever is worth doing, is worth doing well."

"Tarvia B" is admirably adapted for the treatment of sidewalks and walks in parks, hospital grounds and cemeteries. Wooden planking of bridges will last longer if treated with "Tarvia B." Fence posts, sills and houses etc., will be greatly benefits the making of the variation is sheer waste of time and money. A three foot model of a tern schoon- A loose, "happy-go-lucky" applica full rigged, and has a complete code of signals. In the making of the various parts much ingenuity was exercised. The ship's bell was modelled from a gun cap, the windlass from clock parts, the blocks are of leather. The compass, binnacle, water barrels and other equipment were made of odds and ends and are complete ministures. The model, which is after the schooner Royani J. Butt, is a splendid piece of work.

And houses etc., will be greatly benefitted by treatment with "Tarvia B."
