

The Name "Gourlay"

I The name "Gourlay" on a piano is an assurance of careful scientific workmanship, materials of highest quality and superior beauty of tone.

¶ Expert craftsmen give unlimited time and studious thought to the most minute details in every department of its intricate construction.

I The result of this passion for detail is a clear, full rich tone that charms even the most critical minds, and a strong, durable piano that resists the severest tests.

The Gourlay Piano

has met Canada's remarkable growth in musical culture with a responsiveness that has won for it an honored place in thousands of its best homes.

The mellow richness and sweet purity of Gourlay tone, the beauty and delicacy of easy action combine to exert a refining and educating influence that leaves a lasting impression of enthusiasm with both the performer and the list-

I The purchase of a piano involves an appreciable outlayand requires therefore the careful consideration and investigation of every characteristic, vital to the success of a high-grade instrument.

We invite you to our Art Rooms where the Gourlay in the full magnificence of its tonal quality will substantiate its claims to the highest achievement in the art of piano construction.

New Manufacturing Concern
Will Start Operations in Calgary: New Company Is Formed and Has Fly-Proof Patent of Its Own

250 CANS WILL BE PUT OUT EACH DAY

Winnipeg, Vancouver and Many New Venture—Calgary Will Be the Centre of the Whole

one for use in houses and the other for use in hotels, hospitals, and institu-ed.

use in hotels, hospitals, and institu-tions. The inventor of the can is Mr. Chapman, who says he was practically forced into inventing the flyless, odor-less garbage can by hotelmen who had asked him for years to supply an art-icle of this kind. A felt, pad, saturated with disinfectants and deodorizers, is part of the patent, the holders of which claim that the new Calgary in-dustry will wractically revolutionize the garbage problem all over the world. "We intend to take out patents all over Europe and the British Empire," said Mr. Chapman yesterday, "but as far as possible we will confine our manufactories to Calgary. We expect to make this city the headquarters for

our Canadian and American trade, and in a few years' time to build up an important manufactory in this city. In any event, no matter where new factories are located, in Britain or in Europe, the name will never be changed and the graphers can vill always. ed, an dthe garbage can will always be known as the Calgary Sanitary Garbage can."

Mr. Chapman has been a resident of this city for some time, and is well known all over the province. Until he took hold of his present invention he had not tried his head at the took hold.

FOR YET ANOTHER YEAR IN CITY

Filtration Plant Too Costly to Be Installed; Big Scheme Will Come Next Year

intake and reservoir with a complete filtrafion plant, he thinks the citizens must endure muddy water for a few weeks this year.

The water is always muddy at this

season, and in anticipation of this, Commissioner Graves requested Water-works Engineer Fawkes to take the matter up some time ago. The engineer submitted a report showing that the cost of a filtration plant on a large scale would be about \$400,000, and would be prohibitive for one year, in view of the extensive program to be undertaken next year. "We are concentrating our expendi-ture on devices to purify the water of bacteria, and to prevent an epidemic o

typhoid fever and other diseases, and to increase fire protection," said Com-missioner Graves. "The city water is chlorinated and is quite free of bacteria. Although it is unpleasant to look at, it is not dangerous."

At the present time Engineer Fawkes is having erected a temporary chemical purification plant at a cost of \$500 at the Bow river intake, which will chlorinate 20,000,000 gallons daily. At present a small chlorination plant is in use there.

The survey camp of the waterworks The survey camp of the waterworks department has moved on toward the mountains, having completed a survey of the Elbow river up to O'Haggarety's homestead. where they have located dam, and have mapped out alternate courses to the city.

FEDERAL COMPANY

Hon. W. H. Cushing of Cushing Bros., anounced yesterday that the Bros., anounced yesterday that the various rumors which had been circulated to the effect that the business of Cushing Brothers had been sold were incorrect. The only change which had been made in the business, explained Mr. Cushing, was that where the firm had previously worked under a provin-cial charter it would now carry on its

which they consider absolutely flyproof and sanitary.

The new industry will be located in East Calgary, and the start the factory will have a capacity of 250 garbage cans daily. All the cans will carry an advertisement for Calgary, and the patent for the United States has already been taken out under the name of the Calgary Sanitary Garbage Can.

Many Cities Interested.

Already the Winnipeg city authorities are negotiating for a supply of the cans, which will also be supplied to the city of Vancouver and the city of Brantford, Ontario.

"We will start with a staff of 25 menf," said Mr. Chapman yesterday, "and expect to have a monthly payroli of oxer \$7,000, as we will have to bring a number of skilled worken here for special work."

The cans will be made in two sizes, one for use in houses and the other for understance to trading mind the direction of the micro the direction of the reception arrangements for the direction of the direction of the reception arrangements for the direction of the direction of the reception arrangements for the direction of the reception arrangements for the direction of the reception of the reception arrangements for the direction of the reception arrangements for the direction of the reception arrangements for the direction of the reception arrangements for the reception of the reception arrangements for the particl
