DE THOMAS'

Mr. Herbert Osborn **Tells How Cuticura** Healed His Wife

"My wife began to be troubled with tching and burning of the palms of her hands and the soles of her feet. Later the skin cracked and became inflamed, making walking or even standing very pain-ful and preventing sleep at night. Later it became necessary to bandage both hands and feet.

She was treated but obtained no relief. She saw an advertisement for Cuticura Soap and Ointment and sent for a free sample. She bought more and after using two cakes of Cuticura Soap and two boxes of Cuticura Ointment she was healed." (Signed) Herbert Osborn, 135 Sherbrooke

ve. Ottawa, Ont., Sept. 2, 1919. Cuticura is ideal for every-day toilet uses. Soap to cleanse and purify, Ointment to soothe and hea!.

Soap 25c, Ointment 25 and 50c, Sold throughout the Dominion. Canadian Depot: Lymans, Limited, St. Paul St., Montreal.

PAIN IN THE BACK?

Watch Your Kidneys

Pain in the back, nervousness and lack of ambition are the first warnings that the kidneys are deranged. For these conditions use Warner's Safe Kidney and Liver Remedy for quick and beneficial action. Warner's Safe Kidney and Liver Remedy for so years has been the dependable medicine for kidney disease and its offtimes terrible effects.

Warner's Safe Kidney and Liver Remedy contains no narcotics or harmful drug. It is purely a vegetable compound, made from the fresh juices of spicy plants and medicinal roots as are best known to be beneficial in such cases.

ficial in such cases.
Two sizes. Sold by leading druggists everywhere. Warner's Safe Remedies Company, Toronto, Ont.

IMPROVED TONE IN WHOLESALE GROCERIES

The following comment on the market situation as regard foodstuffs appears in Canadian Grocer this week:

Business in wholesale circles during the week under review has shown a better tone, and an improved movement is noted. Retail business has also been better, apparently retail merchants are gaining more confidence, buying more freely as the markets are gradually showing a greater, tendency towards stabilization.

The strength of the nut market is

porters, supplies in primary markets, particularly on French shelled walnuts, show signs of becoming exhausted long before the new crop is harvested. Almonds are also firmer, and prices have advanced several cents per pound. Pecans are holding strong under an active demand for the small supplies available. The free deals on some brands of laundry soaps as announced last week have been withdrawn, and a straight reduction is in effect. This reduction has stimulated buying on soaps, as stocks in retail stores have been fairly light for some time.

Wholesalers in Toronto report an increased demand for canned fruits, for which, during the past season, there has been little sale. One wholesaler stated that during the week their sales run to over 200 cases of fruits. Canned vegetables are ruling fairly steady at

getables are ruling fairly steady at

There is a rumor of a monketting of lams, which is likely tohave the effect of stabilizing prices and putting all brands of jams on the same price basis. Some wholesalers in Toronto have advanced their prices on jams on certain brands, more in line with manufacturers' price lists.

Dried fruits are ruling fairly firm on all lines. Rices are weak and lower. Teas and coffees are unchanged, the market holding firm.

Flour and cereals are in a weak position with prices reduced. Millfeeds also show a reduction.

There are now new developments in the sugar market, refined sugar is steady at the refiners' price basis, although many wholesalers are selling at irregular quotations. The raw sugar market has been fairly steady during the week.

The egg market has firmed up with

the week.

The egg market has firmed up with prices higher. This is attributed to some extent to storage operations becoming more general. Butter is weak and lower prices are likely. Hogs and hog products are also weak with lower prices in sight.

MORE PRICE CHANGES

Hardware and Metals in this week's issue says: ssue says:

Price changes continue on many hardware lines this week. Galvanized wares, including pails, tubs and garbage cans reduced in price. Other reductions ude plated butts, barrel bolts, shelf ackets, wheelbarrows, drag scrapers, ine twine and coal oil. Lower quoations are made on some makes of ash boards, ratchet braces and steel

wash boards, ratchet braces and steel squares.

A new design has been introduced in a well-known safety razor, and the older patterns are being reduced in price. Hockey sticks for fall booking are slightly reduced. A firmer tendency is visible in linseed oil and turpentine, although prices are unchanged. Little change is shown in basic lines of iron and steel, though some slightly lower quotations are reported on sheets, plates and bars. The scrap market remains dull, and ingot metals show little increase of activity, but are inclined to be firmer.

duil, and ingot metals show. Ittle increase of activity, but are inclined to be firmer.

In the primary steel markets the action of the Steel Corporation in reducing prices has been favorably received, and though it is not expected that it will start a buying movement. It is regarded as having brought about a better condition for future business, as the market has a definite price basis to work on. It is also felt that building operations will be encouraged by a more stable steel market.

The situation among wholesale and restrained was a notable increase in public interest, as the bulk of the business came from commission houses. In the early trading attention was again centred on

IN OWN CELLAR

Devotees of Izaak Walton in Nottingham, N. Y., Don't Hav To Wait for Spring.

NOTTINGHAM, N.Y., April 22 .- Followers of "Ike" Walton, how would you and well lighted room, the wind howling, the snow blowing and zero weather outroach? You disciples of "Ike" Walton would no doubt call it a cosy recreconditions for several months. A year ago Mr. Pushwell purchased the property on Main street near the

creek bridge, the creek running through it. Mr. Pushwell decided he could find no better location for a store so he receke. The cellar of the building is 60 feet long, 40 feet wide and 10 feet high. The cellar bottom is planked with four-inch hardwood plank. The creek runs ens all American manufacturers, be under the building.

Drops Into Deep Hole.

The creek for half a mile before reaches the building averages 10 feet deep, then drops into a deep hole, the water under the building being 25 feet

The creek is inhabited by perch, sunfish, reach and bullheads and is known as one of the best fishing streams in this

section. Mr. Pushwell is an ardent fisherman New Year's morning, he went to his cellar, removed a plank, took a long fish line with a hook and sinker on the end of it, baited the hook with salt pork, drove a nail into the plank tied one end of the line to it, dropped the hook into the creek and returned to his office. An hour later, Mr. Pushwell went to the cellar, pulled the line from the creek and landed a perch eight inches long. The nanded a perch eight inches long. The next afternoon, he put his fishing rod together, went down cellar, removed a plank and fished. In an hour's fishing, he landed 11 sunfish, 16 perch and 18 roach. His catch weighed 25 pounds.

Was Always Rewarded. During the long winter evenings, Mr Pushwell took his rocking chair to the cellar, and fished, and was always re-

warded. For several weeks Mr. Pushwell pre-sented his customers with a mess of fresh fish. He would laugh when asked fresh fish. He would laugh when asked where he caught them, and his customers were puzzled. One evening, weeks ago, the fish mystery was solved. Mr. Pushwell's neighbors had been trying to find out where he secured the fish. They passed his store late in the evening and saw a light in the cellar. Mr. Pushwell had forgotten to draw the curtain over the window. There he sat in his rocking chair, rod in his hand, smoking and fishing. The next morning the neighbors accused Mr. Pushwell of fishing in his cellar and he admitted it.

Invited Them To Join Him.

Mr. Pushwell invited the village to

Mr. Pushwell invited the village to enjoy the sport with him. Evenings, rom 10 to 20 members of the "Ike" Walton Club can be found in the cellar fishing. Each fishermen has his camp Three rows of plank are remove the entire length of the cellar, so that all can fish. Large catches of perch, oach and sunfish are being made. Mr. Pushwell has advanced the theory

that late in the fall, the fish work down stream and winter in the deep holes; that they found the hole under his cellar the most comfortable quarters in the stream, the hole being protected by the building, and never freezes. Mr. Pushwell says it is his opinion that every fish in the 10-mile creek is making its home in the hole under his cellar. Limit Size of Catch.

The "Ike" Walton Club has passed solution prohibiting its members from tching more than 10 perch. 8 sunfish and 12 roach in one night. members are obeying the resolution When they make their allotted catch they go home.

The largest catch so far reported was made one night last week when 20 members of the club caught 200 perch, unfish and 240 roach. Mr. Pushwell says the fish will leave the hole April 1, and the cellar fishing

will be over until next winter. T. AND L. CONGRESS PROTESTS AGAINST FRENCH OCCUPATION

LONDON, April 22.-Strong protest against French occupation of the coal fields in the Ruhr district of Germany is contained in a manifesto issued by the parliamentary committee of the Trades Union Congress and the executive of the Labor party tonight. "The proposed coercion of Germany which morally is a renewal of war," adds the manifesto, "will add to the misery of workers in Central Europe,

economic recovery and aggravat our own industrial crisis." HEAVY RAINS ARE DELAYING SEEDING

LOBO, April 22.—A severe storm visited this part of the district last evening, but very little damage was done.

GERMANY MENACES U. S. TOY INDUSTRY

France Proposes Letting Down Tariff Bars To Products of Former Enemy.

NEW YORK, April 22.-American toy manufacturers are strenuously opposed to the reported reparation plan of the like to sit in a rocking chair in a warm French Government to permit the exside, and fish for perch, sunfish and cupied by the Allies under a low tax The letting down of the tariff bars in the matter of goods shipped out of Germany represents a serious menace t ation. Well, Roselle Pushwell of this an American industry that has, by hardvillage has enjoyed fishing under such earned victory in an uphill battle, at tained a position of major importance in and to the United States, it is claimed.

While the evident intent of the from Germany points east of the Rhine is to provide German territory west of with the raw materials needed and originating in Western Germany, it threat cause comparatively few German products reach this country.

Menace to Industry. It particularly threatens the American toy industry, as virtually all of the German toys which are now being dumped on this market are produced east of the Rhine, or, in other words, in the district to be favored by the pro-posed French low export tax. Legislation is now pending in Wash-

ington looking toward the better pro-tection of the American toy industry. European countries, which in prewar days secured most of their toys from Germany, realized as early as 1911 the need of fostering domestic production of toys and official steps were taken to place their respective home toy industries on a firm basis so that they might survive after the war and might survive after the war and so that the children might never again be forced to play with German toys. Since then Japan has entered the world toy field in a very large way and in 1920 light of wax candles, entertained the sent to the United States \$1,000,000 city's theatregoers. sent to the United States \$1,000,000 worth more in toys than did Germany.

Grasp Opportunity.

During the world war, American toy anufacturers grasped the great op-

Canadian-Made Nitro-Bacter Soil Vaccine Is Now Ready for You

To Double Your Crops

Dr. F. M. Wood in His Laboratory. As yeast leavens flour, so Soil Vaccine leavens soil and makes plant food available and doubles production.

The Nitro-Bacter Soil Vaccine is a The Nitro-Bacter Soil Vaccine is a milky liquid swarming with the needed beneficial nitro bacteria in polyvalent form so many strains of these bacteria kept alive and virile for six months by our patented, improved method of preparation, that any soil inoculation with them may be 100 per cent successful.

Cost 50 Cents an Acre—

Returns Equal \$30 Nitrates The Nitro-Bacter Soil Vaccine cuts he cost of nitrates, which crops must The Nitro-Bacter Soil Vaccine cuts the cost of nitrates, which crops must have. At present, nitrates for use on the farm cost in the neighborhood of \$30 for each acre, while this liquid Soil Vaccine can be produced for 50c an acre. The nitrifying bacteria thus supplied to the soil are supplied in greater numbers and more uniformly to all parts of the soil and can be more readily applied than by cropping to any leguminous crop (clovers, etc.). These Nitro-Bacteria, when applied to the soil, multiply enormously and change the decaying vegetable matters, manures and all nitrogen-containing fertilizers into nitrates of soda and potash, and continue their action and potash, and continue their action and multiplication as long as any humus or dead vegetable matter is present in the

It is Nature's method of nitrification reduplicated and intensified. What is it?

After seven years of exhaustive re-search and extensive experiments Dr. F. M. Wood of the State of Illinois, has succeeded in giving to farmers this new method of doubling production on he same acreage and with the same labor as used by their old methods. Nitro-Bacter Liquid Vaccine is a milkly-appearing liquid, which contains a strong virile culture of the Nitro-Bacteria most valuable for soil inoculation.

What it Will Do

When applied to the soil in this liquid form, these Nitrogen Bacteria produce nitrates, supplying food for the plants, which double and treble produc-

tion.
This Soil Vaccine does not in any sense compete with any other nitrogen-producing fertilizer on the market. It makes the nitrogen in all fertilizers, in-cluding animal manures and refuse, available as plant food through the direct action of nitrogen bacteria. It

begins to act at once, when applied to the soil about the roots of plants. It may be applied directly to growing crops, fruits, or flowers. It hastens their growth in making plant vegeta-tion vigorous by supplying available nitrogen.

nitrogen.

It saves the necessity of cropping with clovers or other legumes by supplying nitrifying bacteria direct, so that crop after crop may be grown without using the leguminous crop. It thus saves time as well as money for the farmer. This vaccine makes it possible for any farmer to intensify and greatly increase his production at very little cost.

Testimonials The value of Nitro-Bacter Soil Vaccine is proven from coast to co. Hundreds of testimonials attest and

"I am confident that this vaccine is "I am confident that this vaccine is the key which unlocks the humus in the soil, and will lead to maximum production wherever it is used. From the results which I have obtained it seems reasonable to expect that this vaccine will prove a great boon to farmers and gardeners who may be fortunate enough to use it on their crops."—E. B. T., Edison Park, Ill.

"For the past three years I have observed the effect of the use of your soil Vaccine on garden vegetables and truck, and results have been truly marvelous. The increase in production when it is used on corn, peas, beans, and tomatoes, has frequently been better than 50 per cent over gardens on which the vaccine has not been used."

—E. E. T., Finlaystown, N. J.

"I have observed the results of the "I have observed the results of the use of your Nitro-Bacter vaccine on all kinds of garden vegetables during the past three years. On tomatoes, cabbage, corn and beans the effect during the growing period is rapid increase in size and vigor of green foliage. During the fruiting period there is a large increase in the size and quality of the fruitage."—L. C. J., Hugo, Oregon.

What It Costs

Quantity for 100 acres, 1 bbl. \$50.00 Quantity for 50 acres, ½ bbl. \$30.00 Quantity for 10 acres, 5 gal. \$10.00 Quantity for 2 acres, 1 gal. \$5.00 Quantity for average garden, 1

Lighten Your Farm Work and Keep Prosperous!

Use

Nitro-Bacter

"The Liquid Leaven That Inoculates the Soil"

How To Apply

The farmer will use this vaccine by spraying the barnyard manure load by load as it is hauled from the yard, or by means of a gravity or other sprayer direct to the soil or crop. One barrel of the vaccine is diluted with eight barrels of water. After the eight barrels stand as per directions, they are then diluted one barrel to fifty barrels, making a total of 400 barrels, or four barrels per acre. This will develop or add approximately the same amount of nitrogen per acre as is added by cropping to clover or any leguminous plant. This method of nitrification should give even better results than the cropping to the leguminous plants, because of the enormous increase in the number of bacteria added to the soil. It may be calculated to approximate from 132 to 140 pounds of nitrogen per acre.

A Comparison

If you have any doubt as to the work of these nitrogen-producing bacteria, or if you are not familiar with the growth of germs, a comparison may be interesting. For example, it is a well-known fact that a very small vial of virulent typhoid germs added to the water supply of a community or city may reach every individual, which would cause many deaths, great suffering and loss of life. Just as there are evil germs that cause such terrible results, so also are there good germs—notably those propagated and supplied by the Nitro-Bacter Soil Vaccine, which bring only the greatest benefits to mankind through increasing crop production and greater prosperity because of the work they do in the soil, propagating just as rapidly as the typhoid germ, but doing only good—stimulating and making possible the greater growth of the plants, which produce food for mankind and live stock.

Buying Competition Is Not So Keen-Montreal Prices

OTTAWA, April 22.—Offerings of eggs from Ontario country points are heavier, indicating the buying competition is not so keen. Eggs in storage, April 1, 16.—223 cases; fresh, on floor, 17,299 cases; frozen, 610,555 pounds.

Toronto—Unchanged: country shippers offering storage packed firsts at 38c, f.o.b., cases free.

Montreal—Firm; unchanged.

Edmonton—Receipts increasing; fairly liberal quantities moving into storage; consumptive demand reported heavy.

Vancouver—Firm; country points, 31c; specials, 34c; jobbing, specials, 37c; do., firsts, 35c.

St. John—Receipts costing 28c; jobbing, 34c; retailing, 38@40c.

Chicago—Unchanged.

New York—Unchanged; tendency to lower levels.

POULTRY:

ower levels.

POULTRY:
Edmonton—Few frozen chickens, jobing, 33@37c; fowl. 30@35c.

MONTREAL. April 22.—There was a
irm feeling in the egg market today.

A strong feeling developed in the but-

The strength of the nut market is the strength of the nut market is the rhaps the real feature this week, nder heavy buying on the part of imprers, supplies in primary markets, rticularly on French shelled makets,

hanged prices.
