In announcing officially that the New York boxing commission would not stand for a Dempsey-Wills or a Dempsey-Willard bout, or any other big championship, Chairman Muldoon said his opinion was based on the money involved and the over-importance attached to the proceedings.

### Vote to Enlarge Football League

Now Consist of Ten Teams.

over Mat Morgan, the retiring vice-president.

A splendid year lies before the organ-ization from all appearances, as at least ten clubs have already made application for affiliation with the league. Among them are: The R. C. Regiment, the W. O. Regiment: Grand Trunk, St. An-drews, Maple Leafs F. A., A. and N. Vets, and clubs from St. Thomas and Sarnia. Vets, and clubs from St. Thomas and Sarnia.

The delegate from Sarnia spoke on the question of the association, giving a little more attention to outside points.

Also stating that if this was not done, the clubs would, if they wished to play the good old game, affiliate with the Detroit League, as there were not sufficient teams to form a league of their own.

The new council promised to give this question their first attention. At the next meeting the council will discuss the question of having several of the citizens in general, who are soccer fans, become members on the council, so that in the space of time an absolutely neutral council will come into effect which will give the clubs impartial service.

It was decided that the league will be controlled this year by a council composed of one delegate from each team affiliated. This will allow much composed of one delegate from each team affiliated. This will allow much better and fairer representation than was the case last year when the council was limited to nine members.

The next meeting will be held in the Richmond Hotel. It is essential that all applications for affiliation be received by that time, so that a schedule may be drafted. A postponed game between the W. O. Regt. F. C. and the St. Andrews F. C., which will be staged at soon as the

### LOOK UNDER THE HOOD

Look under the hood for the answer to the astonishing things you hear about good Maxwell performance. You will find it in the wonderful engine, with its over-size crankshaft, three extra large crankshaft bearings, full pressure lubrication through channels bored in the crankshaft, light weight pistons and almost inconceivably smooth bearing surfaces.

It develops tremendous power, displays remarkable pick-up and flexibility, with notable smoothness and quietness, and is so well designed and made that expert mechanical attention is very rarely necessary, even after many thousands of miles of service.
