PERHAPS NO LOCAL disease has puzzled and baffled the medical profession more than nasal catarrh. While not immediately fatal, it is among the most distressing, nauseous and disgusting ills the flesh is heir to, and the records show very few cures of radical cures of chronic catarrh by any of the multitudinous of modes of treatment until the introduction of Ely's Cream Balm a few years ago. The success of this preparation has been most gratifying and surprising.

To prevent haystacks firing, scatter a few handfuls of common salt between each layer. The salt, by absorbing the humidity of the hay, not only prevents its fermentation and consequent heating, but also adds a salty taste to the forage, which all cattle like; besides, it stimulates the appetite and assists their digestion, and so preserves them from many diseases.
