CHEERING FACTS FOR THE BILIOUS. - Every day demonstrates more clearly that Liver Complaint, in all its distressing forms, can be controlled and oured without difficulty or inconvenience. It is an cured without difficulty or inconvenience. It is an obstinate disease, but its obstinacy is not proof against the pertinacious, remedial and restorative operation of HUSTETER'S STOMACH BITTERS. That genial corrective compels the organ to its duty. It must secrete regularly and healthfully under the influence of the Bitters. Their action brings it back from a state of rebellion into perfect barmony with the laws of health. If there is costiveness it disfrom a state of repetition into periect parmony with the laws of health. If there is costiveness, it dis-appears; if there is side ache or back ache, it ceas-es; if the skin and the whites of the eyes are tinged with superfluous bile, they recover their natural hue; if the appetite is gone, it returns; if the digestion is impaired, it is restored; in brief, whatever the symptoms of the complaint may be, and whatever the phase it has assumed, a cure is certain. Such are the uniform effects of this preparation where bilious disease has been already developed; but in cases where there is merely a constitutional tendency to liver complaint, it may be prevented throughout life by the regular use, in small quantities, of this pala-table antidote. These are proven facts, and should be seriously pondered—or, rather, they should be promptly acted upon—by all persons of bilious
