### Products/Services

Back supports • Pillow • Support roll • Hot and cold compress

### Current Export Markets

U.S.A., Europe, Asia, Latin America, Caribbean, Australia, New Zealand

### Company Summary

Since it was launched in 1980, Obus Forme Ltd. has manufactured and sold more than one million Obus Forme back supports worldwide. Obus' uniquely designed patented backrests are moulded to fit the back and offer effective spinal support. Lightweight and portable, the company's versatile orthopedic braces/upright supports have proven highly effective in relieving back pain and providing optimum comfort in auto seats, beds, chairs or sofas. Products are not affected by heat or cold and are backed by a lifetime guarantee.

*Obus Forme conforms to the natural contours of the spine, pushing it back into the correct position and allowing it to relax.*

### Products/Services

Motility implants, conformers, orbital floor implants  
• Suction cups for prostheses removal • Microwave curing flask for artificial eyes

### Current Export Markets

U.S.A., Asia

### Company Summary

Oculo-Plastik, Inc. is a small company specializing in medical ocular plastic implants and related ophthalmic products. Established in 1985 as a branch of an 11-year-old ophthalmologist manufacturer of custom-made artificial eyes, its primary product is a universal implant for which it holds the manufacturing rights worldwide. The company also specializes in enucleation and evisceration implants and conformers for ophthalmologists and oculo plastic surgeons. In addition, Oculo-Plastik developed and markets the tools and technology to cure artificial eyes in a microwave oven.
