

from, by, in or with the use of any of the above-mentioned material or nuclear material,

shall be used, produced, processed, reprocessed, enriched, fabricated, converted or stored only at facilities approved by the supplying Party and shall not be transferred beyond the jurisdiction of the receiving Party without the prior written consent of the supplying Party.

3. Each Party shall be responsible to the other Party for ensuring that the provisions of this Agreement are accepted and complied with by all its governmental enterprises, and by all persons under its jurisdiction.

ARTICLE IV

1. The receiving Party shall take all measures necessary, commensurate with the assessed threat prevailing from time to time, to ensure the physical security of nuclear material referred to in paragraph 1 of Article V of this Agreement, and shall in all cases be guided by standards and recommendations established by the International Atomic Energy Agency regarding the protection of nuclear material.

2. The Parties agree to consult with each other periodically, or at any time at the request of either Party, regarding issues of physical security.

ARTICLE V

1. The Parties agree that

- (i) equipment, material, nuclear material and facilities supplied pursuant to this Agreement,
- (ii) equipment, material, nuclear material and facilities used, produced, developed, processed, reprocessed, enriched, fabricated or converted from, by, in or with equipment, material, nuclear material, facilities or information supplied or obtained pursuant to this Agreement,
- (iii) equipment and facilities which are or may be located within the jurisdiction of the receiving Party and which employ principles contained in information supplied or obtained pursuant to this Agreement,
- (iv) material and nuclear material used, produced, processed, reprocessed, enriched, fabricated or converted from, by, in or with any of the above-mentioned equipment or facilities, and
- (v) all subsequent generations of material and nuclear material used, produced, processed, reprocessed, enriched, fabricated or converted from, by, in or with the use of any of the above-mentioned material or nuclear material

shall be used for peaceful purposes only (and, without in any way limiting the generality of the foregoing, shall not be used for the development, manufacture or detonation of any nuclear explosive device). To this end, all equipment, material, nuclear material and facilities referred to in this paragraph shall be subject to safeguards to be implemented by the International Atomic Energy Agency in accordance with the Agency's Statute⁽¹⁾ and as specified in

⁽¹⁾ Treaty Series 1957 No. 20.
