

each student is, as it were, the member of a society, and he cannot stop his own work without interfering with that of his fellow-Dissectors.

Thus, when the Subject is lying on its Face, the Dissectors of the Upper Limbs must complete their share of the Dissection of the back in two days, so as to allow the Dissectors of the Head and Neck to finish what remains of the Back before the Body is turned. On the other hand, the Dissectors of the Lower Limbs will find that it will take all the time at their disposal to dissect the Gluteal Region, the Popliteal Space, and the back of the Thigh before the Subject is turned.

When the Subject is placed on its back, the Dissectors of the Head and Neck must finish the Dissection of the Posterior Triangles, and the Dissectors of the Upper Limbs must complete the Dissection of the Axillary Spaces in four days, so that they may begin work on the Thorax.

IV.

Each Student will be provided with a Dissecting-room card on which are spaces for the initials of the Demonstrators, given after a satisfactory examination on the Student's *own* part.

Every Student *must* pass three satisfactory examinations on each part dissected ; at the close of the session the card should be handed to the Professor of Anatomy. No schedule will be signed by the Professor of Anatomy unless the Student's card is properly initialed by one of the Demonstrators.
