Toronto Branch of Methodist Church HoHlding Annual Meeting.

About 300 delegates and others are attending the 20th annual meeting of the Toronto Conference Branch of the Women's Missionary Society of the Methodist Church. There will be morning, afternoon and evening sessions until Thursday, when the conference will close.

After the opening exercises and roll call at the initial meeting yesterday afternoon, a long list "In Memoriam,"
was read by the secretary, and a short
address on death and its message was
given by Mrs. George Browne. "Happy

Mrs. J. B. Willmott, in delivering the president's address, hoped that those present would carry back to their auxiliaries inspiration, encouragement auxiliaries inspiration, encouragement and enthusiasm. She also referred to the Easter offering, which 16 years ago had been \$634, the following year had amounted to \$800, and had never been disappointing since. "There are many things to be thankful for," said the president, "not the least of which were the nobler thoughts and the higher ideals that are the result' of the intercourse and literature of the missionary body."

Miss Wellwood, a returned missionary from China, gave some details, respecting the country and the methods of the Methodist woman missionary.

Miss Wellwood "China is unique," Miss Wellwood told the meeting, "because we can trace its civilization of about 4000 years up to a time 500 years before Obstaticities."

Then its civilization was arrested, China still lives. The revolution from a monarchy to a democratic government could scarcely be imagined by anyone living there two years ago.

Napoleon once said: "When China
moves, she will move the world," Miss

A touch of humor was introduced when the returned missionary told that sometimes when she was employing her best Chinese, some one would Interrupt with the statement, "We do not understand your foreign talk." on one occasion a woman in the front seat seemed wonderfully impressed with the discourse. She never took her eyes from the face of the speaker, but her absorption was accounted for when she at last eagerly asked "How do you keep those glasses on your nose?" At other times the lecturer's feet were the spell that fascinated.

You never had your feet bound, had you?" the lady was questioned. The evening was given over to the reports of the treasurer and corresponding secretary, and to an address by Mrs. W. E. Ross.

SOME GARDEN TRICKS

Do you know that you can have your rose bushes covered with flowers long after the blooming season of the rose itself has passed?

And this is the way it may be done. Plant, just beneath the rose bush, and about two inches from the main stem, a plant of nicotina. Everyone knows how tall and straggly the long slim willowy flower-stems of nicotinia grow. These long shoots will shoot up be-tween the branches of the rosebush, which will serve as a firm support for

Why not allow your elements vines Why not allow your clematis vines to climb up the trunk of any tall tree on your lawn? If the tree is trimmed high, sufficient sun will be obtained by the clematis, to afford splendid growth. The tree will not be injured by affording support to the vine. There are many little tricks an observant gardener may make use of, such as these mentioned, all of which will save many an odd moment's work, and enhance the beauty and comfort of his home. He needs but to look around him, and study how to make use of the things at his hand.
